Treatment for attention deficit hyperactivity disorder (ADHD) can help relieve the symptoms and make the condition much less of a problem in day-to-day life. ADHD can be treated using medicine or therapy,

but a combination of both is often best.

Treatment - Attention deficit hyperactivity disorder (ADHD)

Psychotherapy may involve only the individual, but it can include others. For example, family or couples therapy can help address issues within these close relationships. Group therapy brings people with similar illnesses together in a supportive environment, and can assist the participant to learn how others cope in similar situations .
