Post Positivist Approaches To Research

Positivism is still the
dominant quantitative
paradigm (Hunter, &
Leahey, 2008), but
there seems to be a
shift towards post-
positivist thinking.
Post-positivism is also
known as
methodological
pluralism (Morris,
McNaughton, Mullins &
Osmond, 2009).
According to Krauss
(2005), the paradigm
the researcher selects
determines the
research methodology.
The post-positivist
paradigm evolved from
the positivist paradigm.

Because all measurement is fallible, the post-positivist emphasizes the importance of multiple measures and observations, each of which may possess different types of error, and the need to use triangulation across these multiple errorful sources to try to get a better bead on what's happening in reality. The post-positivist also believes that all observations are theory-laden and that scientists (and everyone else, for that matter) are inherently biased by their cultural experiences ...

In philosophy and models of scientific inquiry, postpositivism is a metatheoretical stance that critiques and amends positivism. While positivists emphasize independence between the researcher and the researched person, postpositivists argue

that theories, hypotheses, background knowledge and values of the researcher can influence what is observed.

Postpositivists pursue objectivity by recognizing the possible effects of biases. While positivists emphasize quantitative methods, postpositivists c

Postpositivism - SAGE Research Methods

Post-positivism does not aim to disapprove the scientific/quantitative elements of positivism in the research, rather

it emphasises a proper understanding of the directions and perspectives of any research study from multi-dimensions and multi-methods (Guba, 1990; Fischer, 1998). Furthermore Postpositivism is a form of justification for alternative paradigm after the failings of positivism/ neo-positivism.

Positivism and Interpretivism in Social Research. Positivists believe society shapes the individual and use quantitative methods, interpretivists believe individuals shape society and use qualitative methods. Positivism and Interpretivism are the two basic approaches

to research methods in Sociology. Positivist prefer scientific quantitative methods, while Interpretivists prefer humanistic qualitative methods.

Positivism and Interpretivism in Social Research ...

In positivism studies the role of the researcher is limited to data collection and interpretation in an objective way. In these types of studies research findings are usually observable and quantifiable. Positivism depends on quantifiable observations that lead to statistical analyses.

Positivism - Research Methodology

- Post-positivism is a philosophy that rejects positivism and

presents new assumptions in order to unravel the truth. • Core Idea: • Empiricism (which included observation and measurement) was the core of positivism. • Post-positivism pointed out that this core idea was faulty. • Realists and Critical Realists: • Positivists are realists.

Studies aligned with positivism generally focus on identifying explanatory associations or causal relationships through quantitative approaches, where empirically based findings from large sample sizes are favored—in this regard, generalizable inferences, replication of findings, and controlled experimentation have been principles guiding positivist science.

The Positivism Paradigm of Research : Academic Medicine

The key approach of the scientific method is the experiment, the attempt to discern natural laws through direct manipulation and observation.

However, since the middle part of the 20th century things have changed in our views of science. Probably the most important has been our shift away from positivism into what is called post-positivism.
