Hominid Skulls Comparison Lab. Introduction: In this lab you will learn several anatomical features of the human skull and compare this with replicas of several extinct hominids (other bipedal primates, such as Australopithecus). This activity will show that we share most physical traits found in the skull and mandibles, but that there are specific differences between the various hominid species.

Hominid Skulls Comparison Lab - Yavapai College

I created the worksheet with background information from the lab, background info from Nature. The students do a simulation to measure and collect data and observations about different hominoid skulls. It is a case study where the students are a paleontologist that has found an unknown skull sample and must determine what species it belongs to.
