Software Engineering: A Practical research methods (the ...

However, it is widely accepted that, just like any research field, many SE researchers conduct “discovery” (ground-breaking) type of research activities, i.e., research which is not

motivated by the “current” challenges in the software industry, but rather presenting ground-breaking new approaches to SE which could or would possibly improve SE practices in future, e.g., research on automated program repair which took many years to be gradually used by industry (Naitou et al. 2018).

Practical relevance of software engineering research ...

Abstract. Software engineering is a pragmatic discipline. From the very beginning, the mindset of the software engineering research community has been focused on solving problems faced by practicing software engineers [1], and hence, much of software engineering work is motivated by pragmatic

outcomes. To this day, software engineering research results typically require at least a semi-plausible scenario by which they can be used by practicing software engineers to assist in their ...

Software Engineering - an overview | ScienceDirect Topics

As we recently passed the milestone of "50 years of software engineering", some recent positive efforts have been made in this direction, e.g., establishing "industrial" tracks in several SE conferences. However, many researchers and practitioners believe that we, as a community, are still struggling with research relevance and utility.
