Renault first began building automobiles in 1898 and had been experimenting with tractors by 1910. During World War One, Renault built a light tank for the French Army, and its first production tractor was based on this design. Tractors became a priority after World War

Two, in part due to orders from the government to rebuild the farm economy.

Renault Agriculture - Wikipedia

4WD tractors make it
easier to transport
loads over uneven
terrain. In a 4WD
vehicle, power is sent
to each wheel to
provide extra traction,
which reduces the

chance of wheel slippage, and helps the tractor perform efficiently. 4WD types are efficient at pulling and plowing, and for traversing hills or uneven ground.
