Reference ranges - Manchester University NHS Foundation Trust

In health-related fields, a reference range or reference interval is the range of values that is deemed normal for a physiologic measurement in healthy persons. It is a basis for comparison for a physician or other health professional to interpret a set of test results for a particular patient. Some important reference ranges in medicine are reference ranges for blood tests and reference ranges for urine tests. The standard definition of a reference range originates in what is most prevalent in
