Introduction -- Chapter 1 of 'Network Analysis ...

Network analysis helps us understand what problems we are trying to solve, and in the process, we compile information that will be used in developing an architecture and design. Network architecture uses this information to develop a high-level, end-to-end structure for the network. A network architecture develops the major network functions (e.g., addressing/routing, network management, performance, security) as architectural components that will be brought together to form the network ...
