A drum and bass producer showed me how using uncompressed samples and manually volume matching things together made his Amens sound so much punchier and "glued" together than taking already compressed samples and then throwing more compression on top of that.

I highly recommend DM1 on the iPad. It's arguably the best drum machine in the world and comes loaded with like 150 kits and only costs like \$10. The reason I recommend it so much is it has pads to tap out beats and a sequencer to clean things up. I typically tap each part of a

drum beat out individually starting with the kick.
