Leaders in Construction Contract Labour Supply & Hire ...

The labour constants are for the major items of “on-site” works for which rates are given in the “Detailed Trade Rates” section. The constants are intended as an average guide only, and ‘labour factor’ could be considered a better term, as the labour content of work items can vary considerably depending on the circumstances.

Contents

- The labour cost components of a building project often ranges from 30% -50% from total overall cost. In some conditions, it can goes as high as 60% from total costs.
- Hence, it is a vital component of a construction project.
