Abstract. Since 1960, membrane technology has transformed from laboratory development to proven industrial applications. Continuing advances in development of new membranes with better thermal, chemical, and improved transport properties have led to many new possible applications. Membranes are used extensively for desalination, potable water production, treating industrial

effluents, water reclamation, and reuse.

Membrane Technology and Engineering for Water Purification ...

Membranes are not only used for filtration, extraction, and distillation, they can also be applied for gas storage in biogas plants or act as catalysts in syntheses. In this virtual issue, various membrane applications are presented ranging from wastewater treatment, e.g., to remove organic dyes, to CO 2 separation from gas mixtures.
