History Coastal Engineering

History of Coastal Engineering. Coastal
engineering, as it relates to harbours,
starts with the development of ancient
civilizations together with the origin of
maritime traffic, perhaps before 3500
B.C. Docks, breakwaters, and other
harbour works were built by hand and
often in a grand scale. Some of the
harbour works are still visible in a few of
the harbours that exist today, while
others have recently been explored by
underwater archaeologists.

Coastal engineering is a branch of civil
engineering concerned with the specific
demands posed by constructing at or
near the coast, as well as the
development of the coast itself. The
hydrodynamic impact of especially
waves, tides, storm surges and tsunamis
and the harsh environment of salt
seawater are typical challenges for the
coastal engineer - as are the
morphodynamic changes of the coastal
topography, caused both by the
autonomous development of the system
and man-made changes. The ...
