One objective of a risk assessment is to narrow down the possible risks to those that are the most likely and the most serious. In the terminology of the UNGPs, these priority risks are termed the most “salient” (see below). In a supply chain context, the most likely risks with which businesses may be associated include: Risk category Relevant

A guide to risk assessment in supply chains

The key stages of risk assessment . Stage 1: Mapping your supply chain . The first stage is to build a picture of where suppliers are located and what they do – a supply chain map. This should be by tier of supplier and where they operate. It should also include outsourced contractors and labour providers as these can be the source of high risk issues.

Where to begin with supply chain risk assessment | Sedex

Each node of the supply chain—suppliers, plants, warehouses, and transport routes—is then assessed in detail (Exhibit 1). Risks are entered on a risk register and tracked rigorously on an ongoing basis. In this step, parts of the supply chain where no data exist and further investigation is required should also be recorded.

A practical approach to supply-chain risk management ...

Supply chain risk management refers to the process by which retailers take strategic steps to identify, assess, and mitigate risks within their end-to-end supply chain. There are both internal and external risks that can disrupt your supply chain, so it's helpful to understand the difference between the two. External Supply Chain Risks

10 Supply Chain Risk Management Strategies

SCAIR®'s Supply Node Exposure Estimator module is the tried and tested business interruption estimation tool that can help you understand the vulnerable links in your organisation's product supply chain. It maps out critical supply points and their relationships with each other and produces loss estimates for failures in supply chains which could result in business interruptions.
