Course Overview Introduction to Flight Dynamics Math ...

Flight dynamics is the science of air vehicle orientation and control in three dimensions. The three critical flight dynamics parameters are the angles of rotation in three dimensions about the vehicle's center of gravity, known as pitch, roll and yaw. Control systems adjust the orientation of a vehicle about its cg. A control system includes control surfaces which, when deflected, generate a moment about the cg which rotates the aircraft in pitch, roll, and yaw. For example, a pitching moment c
