Theories of Intelligence in Psychology

General intelligence, also known as g
 factor, refers to a general mental ability
 that, according to Spearman, underlies
 multiple specific skills, including verbal,
 spatial, numerical and mechanical.
 Charles Spearman, an English
 psychologist, established the two-factor
 theory of intelligence back in 1904

(Spearman, 1904).

Intelligence: Definition, Theories & Testing | Simply ...

The g-factor and the s-factor are two parts of Spearman's Two-factor theory of intelligence. IQ tests, which measure general cognitive ability, are derived from his theory of general intelligence. Triarchic theory of intelligence. American psychologist, Robert Sternberg, made his name by proposing the triarchic theory of intelligence. This theory asserts that human intelligence can be divided into three types: analytical, creative, and practical intelligence.

Gardner defines intelligence as a “biopsychological potential to process information that can be activated in a cultural setting to solve problems or create products that are of value in a culture” (Gardner, 2000, p.28). 8 Intelligences - Theory of Multiple Intelligences Explained - Dr. Howard Gardner - YouTube.

Gardner's Theory of Multiple Intelligences | Simply Psychology

Cognitive Theories of Intelligence: These theories are otherwise called process-oriented theories. They focus on intellectual processes; the patterns of thinking and reasoning in people, used to solve problems. These theories

consider intelligence as a process which helps to deal with problems and to find out the answers.

Theories of Intelligence: Notes on Theories of Intelligence

The triarchic theory of intelligence proposes that there are three distinct types of intelligence: practical, distinct, and analytical. It was formulated by Robert J. Sternberg, a well-known psychologist whose research often focuses on human intelligence and creativity.

Understanding the Triarchic Theory of Intelligence

Intelligence is often defined as our intellectual potential; something we are born with, something that can be

measured, and a capacity that is difficult to change. In recent years, however, other views of intelligence have emerged. One such conception is the theory of multiple intelligences proposed by Harvard psychologist Howard Gardner.

First published in 1985, this book presents a 'triarchic' theory of human intelligence that goes beyond IQ in its conceptualisation and implications for assessment. The theory has three parts. The first deals with relations between intelligence and experience; the second, with relations between intelligence and the external world; the third part with relations between intelligence and ...

Beyond IQ: A Triarchic Theory of Human Intelligence ...

A typical dictionary definition of intelligence is “the capacity to acquire and apply knowledge.” Intelligence

includes the ability to benefit from past experience, act purposefully, solve problems, and adapt to new situations. Intelligence can also be defined as “the ability that intelligence tests measure.”

Intelligence: Theories of Intelligence | SparkNotes

This idea was also expressed in Francis Galton’s theory of intelligence, which understood the intellect as one more tool created by evolution and the selection of the best adapted individuals. As the most intelligent people had a greater capacity to adapt to new situations, this was a great evolutionary advantage that needed to be enhanced.

Francis Galton's theory of intelligence [NUOVO]

Cognitive-contextual theories emphasize processes that demonstrate intelligence within a particular context (such as a cultural environment). Major theories include Sternberg’s triarchic theory, Gardner’s theory of multiple intelligences, and Piaget’s theory of development.

Theories of Intelligence - Oxford Handbooks

The theory of multiple intelligences proposes the differentiation of human intelligence into specific “modalities of intelligence”, rather than defining intelligence as a single, general ability. The theory has been criticized by mainstream psychology for its lack of empirical evidence, and its dependence on subjective judgement.

Theory of multiple intelligences - Wikipedia

The triarchic theory of intelligence describes the relationship between intelligence and an individual's inner life through the components of the mental processes that are involved in thinking: The executive process that you use to plan, control, and evaluate the solutions to problems or tasks.
