Big Bang of Cosmology - IET

Understanding the nature of the “big bang” is at the heart of cosmology and requires synthesis of a wide variety of fundamental elements such as quantum theory, gravitational physics, particle physics and/or string theory. Further, for a theory of the big bang to be confirmed or falsified, it has to be connected to experiment and observations.

Cosmology

Due to the quantum geometry, the Big Bang is replaced by a big bounce without any assumptions on the matter content or any fine tuning. An important feature of loop quantum cosmology is the effective space-time description of the underlying quantum evolution.
