This is the original Java version of the PhET Energy Skate Park simulation, in which students explore conservation of energy by building ramps, jumps, and tracks for a skateboarder. For the beginning learner, the relationship of kinetic and potential energy is well illustrated by clicking "Bar Graph".

Founded in 2002 by Nobel Laureate Carl Wieman, the PhET Interactive Simulations project at the University of Colorado Boulder creates free interactive math and science simulations. PhET sims are based on extensive education research and engage students through an intuitive, game-like environment where students learn through exploration and discovery.
