Histology and anatomy for medical education - WebPath

Histology, branch of biology concerned with the composition and structure of plant and animal tissues in relation to their specialized functions. The terms histology and microscopic anatomy are sometimes used interchangeably, but a fine distinction can be drawn between the two studies. The fundamental aim of histology is to determine how tissues are organized at all structural levels, from cells and intercellular substances to organs.

Histology | physiology | Britannica

Histology,[help 1] also known as microscopic anatomy or microanatomy, is the branch of biology which studies the microscopic anatomy of biological tissues. Histology is the microscopic counterpart to gross anatomy, which looks at larger structures visible without a microscope. Although one may divide microscopic anatomy into organology, the study of organs, histology, the study of tissues, and cytology, the study of cells, modern usage places these topics under the field of histology. In medicin

Histology - Wikipedia

A major in Anatomy and Histology is offered by the School of Medical Science, Faculty of Medicine and Health. Units of study in this major are mostly available at standard and advanced level. The Discipline of Anatomy and Histology is internationally recognised for both education and research in human anatomy, histology and neuroscience.
