Differences and Similarities Between Beck's Anxiety Inventory and Generalized Anxiety Disorder-7 Inventory

A Practical Analysis of Functional Differences

Concurrent Validation of the Burns Anxiety Inventory (25 Item) Using the Beck Anxiety Inventory and the Structured Interview Guide for the Hamilton Anxiety Scale

Anxiety disorders are a pervasive problem in our world, afflicting millions of people. The high prevalence of anxiety disorders clearly points to the necessity of developing valid and reliable measures of anxiety for accurate assessment and treatment of this disorder. A variety of checklists and rating scales have been developed in recent years to meet the critical need for accurate anxiety measurement. Two of these measures, the Beck Anxiety Inventory (BAI) and the Structured Interview Guide for the Hamilton Anxiety Scale (SIGH-A) are well established and widely used instruments for measuring anxiety symptoms, demonstrating good validity and reliability.

AN ITEM RESPONSE THEORY ANALYSIS OF BECK ANXIETY INVENTORY.

Practitioner's Guide to Empirically Based Measures of Anxiety Springer Science & Business Media

This spiral-bound reference for practitioners and instructors describes various measurement tools for assessing anxiety and related disorders. Produced in conjunction with the Association for Advancement of Behavior Therapy, the volume includes reviews of more than 200 instruments for measuring anxiety in adults. A sampling of topics includes cultural issues; assessment in older adults; and assessment tools for panic disorder, specific phobia, social phobia, obsessive compulsive disorder, generalized anxiety disorder, and post-traumatic stress disorder. c. Book News Inc.

Concurrent Validation of the Burns Anxiety Inventory-Revised Using the Beck Anxiety Inventory and the Burns Anxiety Inventory

Anxiety disorders are a pervasive problem in the United States and throughout the world. The high prevalence of anxiety disorders clearly evidences a necessity for valid and reliable assessment instruments for researchers and clinicians. In recent years, a variety of checklists and rating scales have emerged that assess for the presence of anxiety symptoms. Two of these instruments, the Beck Anxiety Inventory and the Burns Anxiety Inventory, constitute two widely used and well researched self-report scales for measuring anxiety symptoms. Both of these instruments demonstrate good reliability and validity. The purpose of the present study was to evaluate the concurrent validity of the Burns Anxiety Inventory-Revised, a recently developed self-report measure for anxiety for which there is a paucity of validity research. This was accomplished by correlating scores on the Burns Anxiety Inventory-Revised using a sample of 100 undergraduate participants. The correlations found among these inventories resulted in statistically significant correlation coefficients, suggesting that the Burns Anxiety Inventory-Revised is a valid measure of anxiety. Additionally, the Burns A-R demonstrated high item intercorrelation suggesting the instrument is a homogenous scale.

Reliability and Validity of the Beck Anxiety Inventory for Deaf College Students

"The primary purpose of the present investigation was to examine the reliability and validity of the B[eck] A[nxiety] I [nventory] using a sample of 50 deaf college students." -- Abstract (leaf v).

Concurrent Validation of the Mind Over Mood Anxiety Inventory Using the Beck Anxiety Inventory and the Burns Anxiety Inventory
Anxiety disorders occur with high frequency in the United States and throughout the world. The high prevalence of anxiety disorders clearly points towards the necessity for valid and reliable assessment instruments for researchers and clinicians. In recent years, a variety of checklists and rating scales have emerged that assess for the presence of anxiety symptoms. Two of these instruments, the Beck Anxiety Inventory and the Burns Anxiety Inventory constitute two widely researched self-report scales for measuring anxiety symptoms. Both of these inventories consistently demonstrate good reliability and validity. The primary focus of the present study was to evaluate the concurrent validity of the Mind Over Mood Anxiety Inventory, a recently developed self-report measure of anxiety. This was accomplished by correlating scores on the Mind Over Mood Anxiety Inventory with scores on the Beck Anxiety Inventory and the Burns Anxiety Inventory using a sample of 104 undergraduate participants. The correlations found among these inventories resulted in statistically significant correlation coefficients, suggesting that the Mind Over Mood Anxiety Inventory is a valid measure of anxiety. Additionally, the MOM-A demonstrated high item intercorrelation, suggesting the instrument is a homogeneous scale.

Measuring Health

A Guide to Rating Scales and Questionnaires *Oxford University Press*
Worldwide economic constraints on health care systems have highlighted the importance of evidence-based medicine and evidence-based health policy. The resulting clinical trials and health services research studies require instruments to monitor the outcomes of care and the output of the health system. However, the over-abundance of competing measurement scales can make choosing a measure difficult at best. Measuring Health provides in-depth reviews of over 100 of the leading health measurement tools and serves as a guide for choosing among them.LNow in its third edition, this book provides a critical overview of the field of health measurement, with a technical introduction and discussion of the history and future directions for the field. This latest edition updates the information on each of the measures previously reviewed, and includes a complete new chapter on anxiety measurement to accompany the one on depression. It has also added new instruments to those previously reviewed in each of the chapters in the book.LChapters cover measurements of physical disability, social health, psychological well-being, anxiety, depression, mental status testing, pain, general health status and quality of life. Each chapter presents a tabular comparison of the quality of the instruments reviewed, followed by a detailed description of each method, covering its purpose and conceptual basis, its reliability and validity and, where possible, shows a copy of the actual scale. To ensure accuracy of the information, each review has been approved by the original author of each instrument or by an acknowledged expert.

Leading-edge Psychological Tests and Testing Research *Nova Publishers*
Psychological testing has grown exponentially as technological advances have permitted it to and societal complexities have necessitated its growth. Psychological testing or psychological assessment is a field characterised by the use of samples of behaviour in order to infer generalisations about a given individual. By samples of behaviour, one means observations over time of an individual performing tasks that have usually been prescribed beforehand. These responses are often compiled into statistical tables that allow the evaluator to compare the behaviour of the individual being tested to the responses of a norm group. The broad categories of psychological evaluation tests include: Norm-referenced, IQ/achievement tests, Neuropsychological tests, Personality tests, Objective tests (Rating scale), Direct observation tests, Psychological evaluations using data mining. New and important research is presented in this book.

The Beck Depression Inventory and the State-trait Anxiety Inventory as Predictors of DSM-III Affective Diagnosis and Treatment Compliance

Concurrent Validation of the Structured Interview Guide for the Hamilton Anxiety Scale Using the Beck Anxiety Inventory, the Burns Anxiety Inventory, and the State-Trait Anxiety Inventory
Anxiety disorders are a serious problem in our world, afflicting millions of people worldwide, including adolescents and individuals diagnosed with Autism Spectrum Disorders (ASD). Valid and reliable measures of anxiety disorders are essential for accurate assessment and treatment of this disorder with individuals also diagnosed with ASDs. Several self-report measures have been developed to meet the need for accurate anxiety measurements. The Beck Anxiety Inventory (BAI), the Burns Anxiety Inventory (33 item) and the State-Trait Anxiety Inventory (STAI) are established and widely used instruments for measuring anxiety symptoms. These instruments demonstrate good validity and reliabilty within the general population. The BAI is extensively used in assessing anxiety in adolescents with Asperger's Disorder and High Functioning Autism (HFA). The purpose of the present study is to determine the concurrent validity of the Structured Interview Guide for the Hamilton Anxiety Scale (SIGH-A), a semi-structured interview to assess anxiety in individuals with Asperger's Disorder and HFA. Fifteen individuals diagnosed with Asperger's Disorder or HFA were recruited to participate in this study. They were administered the BAI, Burns Anxiety Inventory (33 item), STAI, and SIGH-A. Correlation coefficients were calculated to determine the relationship between scores on each of these measures. The results of this study suggest that the SIGH-A has acceptable concurrent validity. Limitations of this study and recommendations for future research are also discussed.

Mind Over Mood, Second Edition

Change How You Feel by Changing the Way You Think *Guilford Publications*
"This life changing book helps readers use cognitive-behavioral therapy - one of today's most effective forms of psychotherapy - to conquer depression, anxiety, panic attacks, anger, guilt, shame, low self-esteem, eating disorders, substance abuse, and relationship problems. The second edition contains numerous new features : expanded content on anxiety ; chapters on setting personal goals and maintaining progress ; happiness rating scales ; gratitude journals ; innovative exercises focused on mindfulness, acceptance, and forgiveness; new worksheets ; and much more."--Publisher.

The Use of Psychological Testing for Treatment Planning and Outcomes Assessment

Volume 3: Instruments for Adults *Routledge*
This thoroughly revised and greatly expanded third edition of a classic reference, now three volumes, constitutes an invaluable resource for practitioners who in a managed care era need to focus their testing not on the general goals of personality assessment, symptom identification, and diagnosis so often presented to them as students and trainees, but on specific questions: What course of treatment should this person receive? How is it going? Was it effective?

Encyclopedia of Child Behavior and Development *Springer Science & Business Media*
This reference work breaks new ground as an electronic resource. Utterly comprehensive, it serves as a repository of knowledge in the field as well as a frequently updated conduit of new material long before it finds its way into standard textbooks.

Somatic Symptoms in Adult Anxiety Disorders and Response to Cognitive Behavioral Therapy

Cognitive Therapy

100 Key Points and Techniques *Routledge*
Cognitive Therapy: 100 Key Points and Techniques is a crisp, concise elaboration of the 100 main features of the most popular and best validated approach within the field of cognitive behaviour therapy. The 100 key points cover cognitive therapy theory and practice, and examine misconceptions about this approach. Divided into helpful sections, topics covered include assessment, homework, ways of detecting NATS, uncovering core beliefs and relapse prevention. This neat, usable book is an essential guide for psychotherapists and counsellors, both in training and in practice, who need to ensure they are entirely familiar with the key features of cognitive behavioural therapy.

International Handbook of Cognitive and Behavioural Treatments for Psychological Disorders *Elsevier*
This handbook shows the wide perspective cognitive-behavioural treatment can offer to health professionals, the vast majority of whom now recognize that cognitive behavioural procedures are very useful in treating many 'mental' disorders, even if certain disciplines continue to favour other kinds of treatment. This book offers a wide range of structured programmes for the treatment of various psychological/psychiatric disorders as classified by the DSM-IV. The layout will be familiar to the majority of health professionals in the description of mental disorders and their later treatment. It is divided into seven sections, covering anxiety disorders, sexual disorders, dissociative, somatoform, impulse control disorders, emotional disorders and psychotic and organic disorders. Throughout the twenty-three chapters, this book offers the health professional a structured

guide with which to start tackling a whole series of 'mental' disorders and offers pointers as to where to find more detailed information. The programmes outlined should, it is hoped, prove more effective than previous approaches with lower economic costs and time investment for the patient and therapist.

Handbook of Assessment in Clinical Gerontology *Academic Press*

New trends in mental healthcare practice and a rapid increase in the aged population are causing an explosion in the fields of clinical gerontology and geropsychology today. This comprehensive second edition handbook offers clinicians and graduate students clear guidelines and reliable tools for assessing general mental health, cognitive functioning, functional age, psychosocial health, comorbidity, behavior deficits, and more. Psychopathology, behavioral disorders, changes in cognition, and changes in everyday functioning are addressed in full, and a wide range of conditions and disorders common to this patient population are covered. Each chapter provides an empirical review of assessment instruments, assessment scales in their totality, a review of how these instruments are used with and adapted for different cultural groups, illustration of assessments through case studies, and information on how to utilize ongoing assessment in treatment and/or treatment planning. This combination of elements will make the volume the definitive assessment source for clinicians working with elderly patients. The most comprehensive source of up-to-

date data on gerontological assessment, with review articles covering: psychopathology, behavioral disorders, changes in cognition, and changes in everyday functioning Consolidates broadly distributed literature into single source, saving researchers and clinicians time in obtaining and translating information and improving the level of further research and care they can provide Chapters directly address the range of conditions and disorders most common for this patient population - i.e. driving ability, mental competency, sleep, nutrition, sexual functioning, demntias, elder abuse, depression, anxiety disorders, etc Fully informs readers regarding conditions most commonly encountered in real world treatment of an elderly patient population Each chapter cites case studies to illustrate assessment techniques Exposes reader to real-world application of each assessment discussed

Depression

Causes and Treatment *University of Pennsylvania Press*

"This is a book which should be read by every medical student and psychiatric resident as well as by psychiatrists already in practice."--American Journal of Psychiatry
