Remember that security risks often

don't involve months of prep work or backdoors or whatever else you saw on Swordfish ;) In fact one of the bigges newbie mistakes is not removing "<" from user input (especially when using message boards) so in theory a user could secerely mess up a page or even have your server run php scripts which would allow them to wreak havoc on your site.

PHP: Security - Manual

phpcs-security-audit is a set of PHP_CodeSniffer rules that finds vulnerabilities and weaknesses related to security in PHP code. It currently has core PHP rules as well as Drupal 7 specific rules. The tool also checks for CVE issues and

security advisories related to the CMS/framework.
