thoughtful deployment of building materials and methods themselves. Instead of continuing local building traditions, more opportunities arise to make use of new and emerging products and construction methods. Many of these technologies are already developed, but little known or scarcely implemented by a wider audience of architects and contractors.

Advanced Construction Methods

There are two things that go into sustainable construction: the materials that are used and the methods that are

utilized. Materials. One of the best ways to practice sustainability in construction is through the materials that are used. A new generation of stronger, lighter and more sustainable building materials can help solve many problems in the industry as well as push current practices to be more sustainable.
