Deep, Dark and Dangerous**The Story of British Columbia's**

World-Class Undersea Tech Industry

Harbour Publishing

How British Columbia became an international hotspot for submarines, submersibles, Newtsuits, underwater robotics, Arctic sonar and a host of other cutting-edge undersea technologies. In *Deep, Dark & Dangerous*, maritime historian Vickie Jensen explores the fascinating story of British Columbia's rise to become a world leader in the underwater tech industry. She profiles both trailblazing innovators and newcomers to the field, and traces BC's colourful history and bright future as a front runner in the world of subsea technology innovation. This little-known saga began in the early 1960s. Two commercial hard-hat divers from the Vancouver area, Don Sorte and Al Trice,

realized that they needed a small manned submersible with robot arms for deep-sea work. They couldn't find one to buy, so they decided to partner with machinist Mack Thomson and build their own. Experts told them it would be suicidal to try a home-made version, but just over two years and \$100,000 later, their *Pisces I* was successfully making two-thousand-foot dives. They formed International Hydrodynamics, which went on to build fourteen submersibles and produce a generation of experts that would launch an entire industry of subsea companies in BC. During the same period, Phil Nuytten went from opening Vancouver's first scuba shop as a teenager to becoming a commercial diver and starting his undersea construction company at age twenty-

five. Now, Nuytten is best known for his atmospheric diving suits, Newtsuit and Exosuit, along with a series of submersibles for scientific research. Drawing on her background in documenting both history and industry, Jensen uncovers the stories of over forty subsea pioneers, both historical and current, and details the innovations that are responsible for BC's remarkable and continuing subsea reputation. Written with colour and flair, this is a fascinating and exciting story that anyone can enjoy.

cityscapes, driven by his desire to be anywhere other than Jessup, Missouri. The new kid at St. Ignatius High School, if he isn't being pushed around, he is being completely ignored. Even his beloved woods, his playground as a child and his sanctuary as he grew older, seem to be closing in on him, suffocating him. Then Thomas Elgin moves in across the road, and Boady's life begins to twist and turn. Vaccines - Checking the Dangerous Trend of Unnecessary Vaccination

Mendon Cottage Books

Table of Contents Introduction The Gulf War "Syndrome" The History of Vaccination Booster Dose Ingredients Used in Your Vaccines Antifreeze

Monosodium Glutamate - MSG - Mycoplasma and Foreign DNA Appendix Conclusion Author Bio Publisher Introduction I was just watching a movie, where a social worker arrived at the doorstep of a single father, to see whether he was fit to bring up a baby child on his own, and asked about the vaccines given to the little one. And this is what the father said - Polio, hepatitis B, hepatitis C, measles, mumps, diphtheria, tetanus, chickenpox, influenza, Haemophilus influenza type E, rubella, rotavirus, and pneumococcal conjugate virus. All these vaccines against these diseases had been vaccinated in the little baby, which was around 6 months old. The country was Australia, and the state was New South Wales. I shuddered. The social worker

was very impressed, and naturally, he gave the father a certificate of “fit to bring up a child.” Unfortunately, he did not tell the parent that that child would not live long, because it had already been poisoned with a large number of toxic poisons, under the name of forceful vaccination, which is being forced upon parents, all over the globe, under the rule of, it has to be done. These vaccines must be taken. Or it is possible that your child may be vaccinated without your knowledge or consent, because the doctors have been advised by the health authorities of that particular country or region, to vaccinate a child, willy-nilly, without permission or consent of its guardians. Vaccination in many parts of the US and in also other parts of the World is mandatory today. That means,

in a democratic country, you are being forced to subject your children and yourself to become parts of medical research statistics, all under the name of it has to be done. And because we are so used to believing the ones in authority, that we immediately say yes sir, and extend our arms to receive the possibly fatal or otherwise guaranteed harmful dose of vaccine, all unknowing like and in good faith. This book is a hard-hitting eye-opener, telling you all about the dangers of vaccination, and how a limited number of people and possibly governments/administrations/including the WHO are influencing countries all over the World to get their children vaccinated, or even get themselves vaccinated against possible epidemics and diseases.
