Generalization, in psychology, the tendency to respond in the same way to

different but similar stimuli. For example, a dog conditioned to salivate to a tone of a particular pitch and loudness will also salivate with considerable regularity in response to tones of higher and lower pitch. The generalized response is predictable and orderly: it will measure less than that elicited by the original tone and will diminish as the new tone departs increasingly from the original.

Generalization | concept formation | Britannica

Vary one stimulus at a time to gradually help the student learn generalization. A big part of generalization is switching up the setting, materials, or people involved with a particular skill. Doing all of these things at once, though, could confuse or overwhelm your student.

Effective Ways to Teach Generalization

- Valid generalizations are supported by facts, examples, and logical thinking.
- Watch out for words like all or never.
