Successful masonry construction can proceed despite cold temperatures by following an effective cold weather construction program. The Specification for Masonry Structures(ACI 530.1-08/ASCE 6-08/TMS 602-08) contains minimum requirements for cold weather masonry construction. When ambient temperature falls below 40°F (4.4°C), cold weather construction applies. As the

A cold weather masonry construction and protection plan must be provided as a

project submittal if job site temperatures are anticipated to drop below 40 ° F at any time during the masonry installation. With unanticipated delays, even a job that was supposed to be completed prior to Fall can easily slip below this target temperature.

Cold Weather Masonry Construction

INTRODUCTION.

Successful cold weather masonry construction requires knowledge of code requirements and planning capabilities, along with the capacity to be flexible and innovative. The code provides prescriptive requirements that must be met when the ambient air temperature is below

40°F. The requirements are grouped within temperature ranges, and while the provisions are prescriptive in nature, there is also considerable latitude given to the contractor to use.
