How The Brain Learns To

How the Brain Learns. We have known since antiquity that the seat of learning is the human brain. But it has only been in the last decade that neuroscience researchers have been able to go inside the brain and observe how learning actually occurs at the molecular level. New technologies like diffusion imaging have opened up the brain’s inner workings and allowed scientists to “see” what is going on inside the brain when people are engaged in learning.

How the Brain Learns - Training Industry

The vast majority of our behaviors, both conscious and unconscious, are guided by our ability to store meaningful experiences in memory and recall them when needed. As complex as it may seem, scientists are steadily making progress in unraveling how the brain accomplishes this feat. For University of Chicago neuroscientist David Freedman, PhD, associate professor of neurobiology, the key to better understanding the brain's ability to learn has been to focus on a specific cognitive function ...
