Automated Question Answer System

A well-developed QA system bridges the gap between the two, allowing humans to extract knowledge from data in a way that is natural to us, i.e., asking questions. QA systems accept questions in the form of natural language (typically text based, although you are probably also familiar with systems that accept speech input, such as Amazon’s Alexa or Apple’s Siri), and output a concise answer.

Intro to Automated Question Answering | NLP for Question ...

If you are building a question-answering system and use NLP engine, like Rasa NLU, Dialogflow, Luis, this NLP engine can answer predefined questions. However, if there is no predefined intent, you can call this automatic QnA system to search in documents and return the answer. Continuous learning can be organized by getting feedback from users.

Automatic Question Answering. Querying Information from ...

Question answering systems have been extended in recent years to encompass additional domains of knowledge For example, systems have been developed to automatically answer temporal and geospatial questions, questions of definition and terminology, biographical questions, multilingual questions, and questions about the content of audio, images, and video.

Question answering - Wikipedia

We presented an automated QA system that employs sim-ple but effective query generation approach, uses multiple document sources to compile a strong pool of candidate answers, and then identifies the best answer using trained answer ranking models. Empirical evaluations demonstrate that our system performs 31% and 25% better than the best

Automated Question Answering System For Community-Based ...

This is the generic workflow of an automated question answering system that uses a large corpus of unstructured text as its knowledge base. The system is composed of a document retriever to fetch the most relevant articles and a document reader that ingests these candidate articles in search of a text span that best answers the question.
