Social cognitive theory was developed by Stanford psychologist Albert Bandura. The theory views people as active agents who both influence and are influenced by their environment. A major component of the theory is observational learning: the process of learning desirable and undesirable behaviors by observing others, then reproducing learned behaviors in order to maximize rewards.

In general, it is very readable...The
 content and structure are well suited to
 student needs. The main strength

concerns the integration of social constructionism and discursive psychology with more standard social cognition topics. The description of social identity theory and self categorization

theory is particularly clear. The chapters on prejudice and ideology are also very good and set the manuscript apart from most social cognition texts."
