Making Hard Choices in Journalism Ethics

Cases and Practice *Routledge*

This book teaches students how to make the difficult ethical decisions that journalists routinely face. By taking a case-based approach, the authors argue that the best way to make an ethical decision is to look closely at a particular situation, rather than looking first to an abstract set of ethical theories or principles. This book goes beyond the traditional approaches of many other journalism textbooks by using cases as the starting point for building ethical practices. Casuistry, the technical name of such a method, develops provisional

guidelines from the bottom up by reasoning analogically from an "easy" ethical case (the "paradigm") to "harder" ethical cases. Thoroughly grounded in actual experience, this method admits more nuanced judgments than most theoretical approaches.

Managing in the Gray

Five Timeless Questions for Resolving Your Toughest Problems at Work *Harvard Business Review Press*

How to Resolve the Really Hard Problems Every manager makes tough calls—it comes with the job. And the hardest decisions are the “gray areas”—situations where you and your team have worked hard to find an answer, you’ve done the best analysis you can, and you still don’t know what to do. But you have to make a decision. You have to choose, commit, act, and live with the consequences and

persuade others to follow your lead. Gray areas test your skills as a manager, your judgment, and even your humanity. How do you get these decisions right? In *Managing in the Gray*, Joseph Badaracco offers a powerful, practical, and even radical way to resolve these problems. Picking up where conventional tools of analysis leave off, this book provides tools for judgment in the form of five revealing questions. Asking yourself these five questions provides a simple yet profound way to broaden your thinking, sharpen your judgment, and develop a fresh perspective. What makes these questions so valuable is that they have truly stood the test of time—they've guided

countless men and women, across many centuries and cultures, to resolve the hardest questions of work, responsibility, and life. You can use the five-question framework on your own or with others on your team to help you cut through complexities, understand critical trade-offs, and develop workable solutions for even the grayest issues.

Farsighted

How We Make the Decisions That Matter the Most *Penguin*

The hardest choices are also the most consequential. So why do we know so little about how to get them right? Big, life-altering decisions matter so much more than the decisions we make every day, and they're also the most difficult: where to live, whom to marry, what to believe, whether to start a company, how to end a war. There's no one-size-fits-all approach for addressing these

kinds of conundrums. Steven Johnson's classic *Where Good Ideas Come From* inspired creative people all over the world with new ways of thinking about innovation. In *Farsighted*, he uncovers powerful tools for honing the important skill of complex decision-making. While you can't model a once-in-a-lifetime choice, you can model the deliberative tactics of expert decision-makers. These experts aren't just the master strategists running major companies or negotiating high-level diplomacy. They're the novelists who draw out the complexity of their characters' inner lives, the city officials who secure long-term water supplies, and the

scientists who reckon with future challenges most of us haven't even imagined. The smartest decision-makers don't go with their guts. Their success relies on having a future-oriented approach and the ability to consider all their options in a creative, productive way. Through compelling stories that reveal surprising insights, Johnson explains how we can most effectively approach the choices that can chart the course of a life, an organization, or a civilization. *Farsighted* will help you imagine your possible futures and appreciate the subtle intelligence of the choices that shaped our broader social history.

Conflict

How Soldiers Make Impossible Decisions

Oxford University Press

Conflict: How Soldiers Make Impossible Decisions is about making hard choices--where all outcomes are potentially negative. The authors draw on interviews conducted with soldiers about the situations they faced and the decisions they made at war. These are vivid and sometimes distressing stories. They form the data from which the authors explore the cognitive processes associated with choice, commitment to action and (sometimes) error, as well as goal directed thinking, innovation and courage. By referring to real cases, **Conflict** invites readers to consider their own

responses under extreme circumstances and ask themselves how they would choose between difficult options. In doing so this book will go some way to helping readers understand what it feels like when choosing between least-worst decisions.

Decisive

How to Make Better Choices in Life and Work *Random House Canada*

The four principles that can help us to overcome our brains' natural biases to make better, more informed decisions--in our lives, careers, families and organizations. In **Decisive**, Chip Heath and Dan Heath, the bestselling authors of **Made to Stick** and **Switch**, tackle the

thorny problem of how to overcome our natural biases and irrational thinking to make better decisions, about our work, lives, companies and careers. When it comes to decision making, our brains are flawed instruments. But given that we are biologically hard-wired to act foolishly and behave irrationally at times, how can we do better? A number of recent bestsellers have identified how irrational our decision making can be. But being aware of a bias doesn't correct it, just as knowing that you are nearsighted doesn't help you to see better. In *Decisive*, the Heath brothers, drawing on extensive studies, stories and research, offer specific, practical tools that can

help us to think more clearly about our options, and get out of our heads, to improve our decision making, at work and at home.

The Family Firm

A Data-Driven Guide to Better Decision Making in the Early School Years *Penguin*

The instant New York Times bestseller! "Emily Oster dives into the data on parenting issues, cuts through the clutter, and gives families the bottom line to help them make better decisions." -Good Morning America "A targeted mini-MBA program designed to help moms and dads establish best practices for day-to-day operations." -The Washington Post From the bestselling author of *Expecting*

Better and Cribsheet, the next step in data driven parenting from economist Emily Oster. In *The Family Firm*, Brown professor of economics and mom of two Emily Oster offers a classic business school framework for data-driven parents to think more deliberately about the key issues of the elementary years: school, health, extracurricular activities, and more. Unlike the hourly challenges of infant parenting, the big questions in this age come up less frequently. But we live with the consequences of our decisions for much longer. What's the right kind of school and at what age should a particular kid start? How do you encourage a healthy diet? Should kids play a sport and how seriously? How do you think smartly about encouraging children's independence? Along with these bigger questions, Oster investigates how to navigate the complexity of day-to-day family logistics. Making these decisions is less about finding the specific answer and more about taking the right approach. Parents of this age are often still working in baby mode, which is to say, under stress and on the fly. That is a classic management problem, and Oster takes a page from her time as a business school professor at the University of Chicago to show us that thoughtful business process can help smooth out tough family decisions. The

Family Firm is a smart and winning guide to how to think clearly--and with less ambient stress--about the key decisions of the elementary school years. Parenting is a full-time job. It's time we start treating it like one.

Flow-based Leadership

What the Best Firefighters can Teach You about Leadership and Making Hard Decisions *Technics Publications*

Have you ever arrived on the scene of a house fire to find a frantic woman in the driveway? As a firefighter, you know instinctively what this means: there is a child inside. You immediately enter “the zone,” because you know what to do. This is based on your training and experience. The feeling

of being “in the zone,” is referred to in the field of positive psychology as “the flow.” Multiple studies have shown that, if people have the proper training and experience, they will make better decisions in emerging situations while in a flow-state. How can your organization help your people experience flow more often, thereby improving their decision-making? This book describes what flow is and what flow-based decision making and flow-based leadership look like. It also details a flow-based leadership model for implementation, based on an extreme, experiential training program in the fire service called Georgia Smoke Diver (GSD).

This model consists of :
 Leading by example
 Communicating purpose
 Committing to a stable infrastructure
 Binding the group through ritual, knowledge sharing, and collaboration
 Honoring individual creativity to promote innovation
 Using positive motivation techniques
 Facilitating team flow. GSD's success and longevity is a result of rigorous commitment to this model that helps firefighters stay safe, ensure excellence, and live a life of well-being, both personally and professionally. It is a model any organization can adopt to better the lives of the people within the organization and the lives of the people the organization serves. Whether you're in the

fire service or not, this book provides incredible and truly unique insights into leadership, decision making, and creating exceptionally effective organizational cultures. A must read for anyone who is in a position where his or her decisions impact the work and the lives of others. Judith's writing ignites the imagination with stories that are inspiring, engaging, and deeply moving. You will walk away with a new appreciation for the importance of being "in the flow" and a simple but powerful framework for creating a meaningful and purpose-driven life. Thomas Koulopoulos Chairman Delphi Group, Author The Gen Z Effect Dr. Judy (as she is fondly known in the fire service) has

presented us with a uniquely insightful look at firefighter decision making, going beyond the traditional analytical and weaving the naturalistic with the possible. This is a roadmap for upcoming leaders in any organization in which decisions must be made in chaotic, uncertain and rapidly evolving situations. David M. Wall, Division Director Georgia Fire Academy Throughout my career, I have had the privilege and honor of training with hundreds of high risk professionals. This book gets to the heart of why and more importantly how these individuals can perform at such a high level every day, with on and off the job stresses that are off the charts! Your Financial Life Together

Fear of Missing Out

Practical Decision-Making in a World of Overwhelming Choice *Sourcebooks, Inc.*

What are you really missing out on? You're home on a Friday night, scrolling through Instagram, ready to go to bed. You see pictures on your timeline of a party you were invited to, but didn't go to. You were confident when you said no, but now you can't stop thinking about it, and you start feeling worse. You have FOMO, or, Fear of Missing Out. Coined in a Harvard Business School article, FOMO has become a global term to describe the decimating anxiety

when thinking other people are having better, more fulfilling, experiences than you are. It's a natural, biological response, but that doesn't make it feel any better. Amplified by the rise of social media, #FOMO has become a cultural crisis—so what's the cure? Patrick McGinnis, creator of the term FOMO, has been thinking about it for seventeen years—and he has a solution: decision-making. Learning to weigh the costs and benefits of your choices, prioritizing your decisions, and listening to your gut are central to silencing FOMO and its lesser-known cousin, FOBO: Fear of a Better Option. After all, don't you want to feel comfortable and confident in your

decisions? Written with self-evaluations throughout the book, *Fear of Missing Out: Practical Decision Making in a World of Overwhelming Choice* helps you ascertain and eliminate the parts of your life that are causing more anxiety than happiness. So give this a read, and then go to that party, start that new book, create a new goal—or don't. Make that decision, and be confident in it: it's the first of many of its kind.

Think Again

Why Good Leaders Make Bad Decisions and How to Keep it From Happeining to You *Harvard Business Press*

Why do smart and experienced leaders

make flawed, even catastrophic, decisions? Why do people keep believing they have made the right choice, even with the disastrous result staring them in the face? And how can you be sure you're making the right decision--without the benefit of hindsight? Sydney Finkelstein, Jo Whitehead, and Andrew Campbell show how the usually beneficial processes of the human mind can become traps when we face big decisions. The authors show how the shortcuts our brains have learned to take over millennia of evolution can derail our decision making. *Think Again* offers a powerful model for making better decisions, describing the key red flags to watch for and

detailing the decision-making safeguards we need. Using examples from business, politics, and history, *Think Again* deconstructs bad decisions, as they unfolded in real time, to show how you can avoid the same fate.

Whether we're buying a pair of jeans, ordering a cup of coffee, selecting a long-distance carrier, applying to college, choosing a doctor, or setting up a 401(k), everyday decisions—both big and small—have become increasingly complex due to the overwhelming abundance of choice

with which we are presented. As Americans, we assume that more choice means better options and greater satisfaction. But beware of excessive choice: choice overload can make you question the decisions you make before you even make them, it can set you up for unrealistically high expectations, and it can make you blame yourself for any and all failures. In the long run, this can lead to decision-making paralysis, anxiety, and perpetual stress. And, in a culture that tells us that there is no excuse for falling short of perfection when your options are limitless, too much choice can lead to clinical depression. In *The Paradox of Choice*, Barry Schwartz explains at what point choice—the hallmark of individual freedom and self-determination that we so cherish—becomes detrimental to our psychological and emotional well-being. In accessible, engaging, and anecdotal prose, Schwartz shows how the dramatic explosion in choice—from the mundane to the profound challenges of balancing career, family, and individual needs—has paradoxically become a problem instead of a solution. Schwartz also shows how our obsession with choice encourages us to seek that which makes us feel worse. By synthesizing current research in the social sciences, Schwartz makes the counter

intuitive case that eliminating choices can greatly reduce the stress, anxiety, and busyness of our lives. He offers eleven practical steps on how to limit choices to a manageable number, have the discipline to focus on those that are important and ignore the rest, and ultimately derive greater satisfaction from the choices you have to make.

Judgment Calls

Twelve Stories of Big Decisions and the Teams That Got Them Right *Harvard Business Review Press*

Your guide to making better decisions Despite the dizzying amount of data at our disposal today—and an increasing reliance on

analytics to make the majority of our decisions—many of our most critical choices still come down to human judgment. This fact is fundamental to organizations whose leaders must often make crucial decisions: to do this they need the best available insights. In *Judgment Calls*, authors Tom Davenport and Brook Manville share twelve stories of organizations that have successfully tapped their data assets, diverse perspectives, and deep knowledge to build an organizational decision-making capability—a competence they say can make the difference between success and failure. This book introduces a model that taps the collective judgment of

an organization so that the right decisions are made, and the entire organization profits. Through the stories in *Judgment Calls*, the authors—both of them seasoned management thinkers and advisers—make the case for the wisdom of organizations and suggest ways to use it to best advantage. Each chapter tells a unique story of one dilemma and its ultimate resolution, bringing into high relief one key to the power of collective judgment. Individually, these stories inspire and instruct; together, they form a model for building an organizational capacity for broadly based, knowledge-intensive decision making. You've read *The Wisdom of Crowds* and

Competing on Analytics. Now read Judgment Calls. You, and your organization, will make better decisions.
