COTS - Component Off the Shelf (software development ...

Posted by Laura K. Gray on 24 Jan, 2018 in Software and Apps and Interview and Mobile and SPoC. The PCI SSC has announced a new PCI Security Standard for software-based PIN entry on commercial off-the-shelf devices (COTS), such as smartphones and tablets. The

PCI Software-Based PIN Entry (SPoC) Standard provides a software-based approach for protecting PIN entry on the wide variety of COTS devices in the market today.

New PCI Software-Based PIN Entry on COTS Standard

The component origins compared were mainly focused on in-house vs. COTS and COTS vs. OSS. We identified 11 factors affecting or influencing the decision to select a component origin. When component origins were compared, there was little evidence on the relative (either positive or negative) effect of a component origin on the factor.

Software component decision-making: In-house, OSS, COTS or ...

Even when nothing has changed in the core COTS software, a change in these components can affect the security of the COTS software, for better or worse. The most pressing areas of concern are the environment components such as web servers that COTS applications use as a gateway to the outside world and other systems.

Security Considerations in Managing COTS Software | CISA

PC hardware, such as a desktop computer, is the most common type of IT hardware purchased by a small business. The cost of hardware depends on its specification, which in turn is determined by some key components.. When you buy PC hardware, you need to decide what the specification of these key

components should be.
