Cultural anthropologies focus on relativism can be at odds with the biological approach to anthropology and its historical leanings on determinism. What neuroscience has offered anthropology, through findings on epigenetics and neuroplasticity, is a chance to bring the biological back towards the cultural—it creates space for culture as dialectical to biological change in humans.

Bernard Berofsky Abstract Hardly any attempt to come to grips with the classical problem of free will and determinism directly addresses the metaphysical vision driving the concerns of those who believe that a significant sort of free will cannot exist in a deterministic world (incompatibilists).

Nature's Challenge to Free Will - Oxford Scholarship

Berofsky goes on to demonstrate the failure of efforts to bypass this result either through a defense of the reducibility of all laws to physical laws or a defense of the supervenience of psychological states on physical states. A conception of free will as self-determination plus the power of genuine choice is possible in a deterministic world.
