Looked at as the study of the interaction between living things and their environment, cultural ecology involves human perceptions of the environment as well as the sometimes unperceived impacts of us on the environment and the environment on us. Cultural ecology is all about humans—what we are and what we do, in the context of being another animal on the planet.

Cultural Ecology: Connecting Environment and Humans

Introduction. This extensive work focuses on an important group of temperate freshwater fish, approaching the topic from the perspectives of both biology and aquaculture. It compiles the latest research on fish belonging to the Percidae family and describes in detail all biological aspects relevant to the culture of different species, including ecology, reproductive physiology, feeding and nutrition, genetics, immunology, stress physiology and behavior.
