Museums And The Future Of

Museums – and, similarly, schools and libraries – essentially support a resilient, just and equitable society. Because art is a powerful communicator (artists often offer different perspectives on the world) and museums are dynamic conveners, they must flourish – especially in times of crisis – to help provide context for our lives.

What's next: The future of museums | UCI News | UCI

0945-1045. Reflections on the future of museums. 2020 has brought about unprecedented changes in society. From the pandemic to the climate crisis, to the Black Lives Matter movement, we have had to think about our personal and collective responses to some of the biggest challenges that society has faced for decades.

Conference programme 2020 - Museums Association

September 21, 2020. Two significant factors will affect the foreseeable future of museums. Both the corona plague and the anti-racist movement spreading around the world require museums to

recalculate their trajectory. The Metropolitan Museum of Art in New York recently re-opened after a six-month closure.

Museum Futures will invest in a new generation of diverse museum professionals through on-the-job training in digital skills related to museum collections. This programme will provide paid training opportunities for a wider range of people to work in the museum sector, and to open up careers in museums to people from groups which are currently under-represented in the museum workforce.

Museum Futures

The Museum of the Future Accelerator is a unique opportunity for technology companies to gain unparalleled access to the staff, resources and expertise behind the Museum of the Future. This isn't an accelerator in the traditional sense - we won't teach you how to write a business plan or build an MVP; what we are accelerating is the creation of technology that solves a challenge the Museum of the Future faces.

The Museum Of The Future

The Future of Museums, Past and Present: Pitt Rivers AD 2065. Dan Hicks explores the potential and implications of digital technologies for museums in the future. He argues that the first step in this process is to recognise that museums are places not just for the display of information, but for the co-production of knowledge. Museums, in other words, are not just collections of objects, but always

collections of ideas.
