It is important to remember that solving stoichiometry problems is very similar to following a recipe. Once you know the recipe you can modify it using the same ratios to make the product for more or less people. There are 4 major categories of stiochiometry problems.

Solving Stoichiometry Problems

As we learned previously, double replacement reactions involve the reaction between ionic compounds in solution and, in the course of the reaction, the ions in the two reacting compounds are “switched” (they replace each other). Because these reactions occur in aqueous solution, we can use the concept of molarity to directly calculate the number of moles of reactants or products that will ...
