Origin Of Life Section 2 Answers - toefl.etg.edu.sv

The origin of life is a long-standing and controversial subject concerned with how the first known single-cell organisms called prokaryotes probably originated in the Archean period (4–2.5 BYA) and about 3.8 BYA in the oceans when chemical composition of the ocean and the atmosphere was very different from what it is today (see Dostal et al., 2009). One candidate mechanism involves lightning in the early atmosphere and the consequent production of amino acids that, when combined in long ...

When considering how life began, there are only two options. Either life was created by an intelligent source (God) or it began by natural processes. No Mechanism to Spark Life No mechanism by which non-living matter can randomly spark itself into life has ever been demonstrated.

Origin of Life | Answers in Genesis

The origin of life on Earth is a scientific problem which is not yet solved. There are many ideas, but few clear facts. Most experts agree that all life today evolved by common descent from a single primitive lifeform. It is not known how this early life form evolved, but scientists think it was a natural process which happened about 3,900 million years ago. This is in accord with the philosophy of naturalism: only natural causes are admitted. It is not known if metabolism came first or genetics
