The water boatman provides food for many species including fish, frogs, diving beetles and dragonfly larvae. The yabbies are scavengers, feeding on rotting plant and animal matter, while bacteria also help break down this dead material by digesting it and recycling nutrients in the food web.

Food webs - Work sheet (Middle years)

which in turn demonstrates knowledge of energy flow in a food chain and that a food web is more than just one food chain. One point was earned in part (b)(ii) for stating that "as energy is passed from one trophic level to the next only 10% of the energy is passed along the other 90% is loss [sic]." Two points were earned in part (c) for stating that wetlands provide "a source of income for fishers" and that tourists bring revenue to the area.
