Sapiens

A Brief History of Humankind *Harper Collins*

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores

the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect

past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

Sapiens

A Brief History of Humankind *Signal*
NATIONAL BESTSELLER NEW YORK
TIMES BESTSELLER Destined to become
a modern classic in the vein of Guns,
Germs, and Steel, Sapiens is a lively,
groundbreaking history of humankind
told from a unique perspective. 100,000
years ago, at least six species of human
inhabited the earth. Today there is just
one. Us. Homo Sapiens. How did our
species succeed in the battle for
dominance? Why did our foraging
ancestors come together to create cities
and kingdoms? How did we come to
believe in gods, nations, and human
rights; to trust money, books, and laws;
and to be enslaved by bureaucracy,
timetables, and consumerism? And what

will our world be like in the millennia to
come? In Sapiens, Dr. Yuval Noah Harari
spans the whole of human history, from
the very first humans to walk the earth
to the radical -- and sometimes
devastating -- breakthroughs of the
Cognitive, Agricultural, and Scientific
Revolutions. Drawing on insights from
biology, anthropology, palaeontology,
and economics, he explores how the
currents of history have shaped our
human societies, the animals and plants
around us, and even our personalities.
Have we become happier as history has
unfolded? Can we ever free our
behaviour from the heritage of our
ancestors? And what, if anything, can we
do to influence the course of the
centuries to come? Bold, wide-ranging
and provocative, Sapiens challenges

everything we thought we knew about being human: our thoughts, our actions, our power...and our future.

Homo Deus

A Brief History of Tomorrow *HarperCollins*

Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable

forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial

life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future.

Sapiens *Vintage Classic*

PATTERNED PLANET: SPECIAL EDITIONS OF GROUNDBREAKING SCIENCE BOOKS Planet Earth is 4.5 billion years old. In just a fraction of that time, one species among countless others has conquered it. Us. We are the most advanced and most destructive animals ever to have lived. What makes us brilliant? What makes us deadly? What makes us

Sapiens? In this bold and provocative book, Yuval Noah Harari explores who we are, how we got here and where we're going. Sapiens is a thrilling account of humankind's extraordinary history - from the Stone Age to the Silicon Age - and our journey from insignificant apes to rulers of the world. 'Unbelievably good. Jaw dropping from the first word to the last' Chris Evans, BBC Radio 2

Sapiens: A Graphic History, Volume 2

The Pillars of Civilization *HarperCollins*

The ebook is designed to be read on devices with large color displays The Kindle edition is incompatible with iOS. See below for a list of supported devices. This second volume of *Sapiens: A*

Graphic History, the full-color graphic adaptation of Yuval Noah Harari's #1 New York Times bestseller, focuses on the Agricultural Revolution—when humans fell into a trap we've yet to escape: working harder and harder with diminishing returns. What if humanity's major woes—war, plague, famine and inequality—originated 12,000 years ago, when Homo sapiens converted from nomads to settlers, in pursuit of the fantasy of productivity and efficiency? What if by seeking to control plants and animals, humans ended up being controlled by kings, priests, and Kafkaesque bureaucracy? Volume 2 of Sapiens: A Graphic History—The Pillars of Civilization explores a crucial chapter in human development: the Agricultural Revolution. This is the story of how

wheat took over the world; how an unlikely marriage between a god and a bureaucrat created the first empires; and how war, plague, famine, and inequality became an intractable feature of the human condition. But it's not all doom and gloom with this book's cast of entertaining characters and colorful humorous scenes. Yuval, Zoe, Prof. Saraswati, Cindy and Bill (now farmers), Detective Lopez, and Dr. Fiction, all introduced in Volume 1, once again travel the length and breadth of human history, this time investigating the impact the Agricultural Revolution has had on our species. The cunning Mephisto shows them how to ensnare humans, King Hammurabi lays down the law, and Confucius explains harmonious society. The origins of modern farming

are introduced through Elizabethan tragedy; the changing fortunes of domesticated plants and animals are tracked in the columns of the Daily Business News; the story of urbanization is portrayed as a travel brochure, offering discount journeys to ancient Babylon and China; and the history of inequality unfolds in a superhero detective story; with guest appearances by historical and cultural personalities throughout such as Thomas Jefferson, Scarlett O'Hara, Margaret Thatcher, and John Lennon. Sapiens: A Graphic History, Volume 2 is a radical, witty and colorful retelling of the story of humankind for adults and young adults, and can be read on its own or in sequence with Volume I.

Homo Sapiens

A Brief History

University Press returns with another short and captivating book - a brief history of our human species: Homo sapiens. All the humans who ever lived are extinct - except for Homo sapiens. We are, in Latin, the "wise humans." We are the sole survivors of a long and deadly battle against the forces of nature and time. The first humans - hominids - diverged from the other primates and began to walk upright on two legs some 3 million years ago. The first "modern" humans - Homo sapiens - diverged from the other hominids some 250,000 years ago. Since then, modern humans and our big brains migrated out of Africa, developed the capacity for

language, domesticated animals, became farmers, learned to write, got religious, built cities, invented money, expanded empires, harnessed the scientific method, tried enlightenment, challenged authority, created machines, conquered the air, weaponized the atom, eliminated disease, walked on the moon, did the internet, made artificial intelligence, fed seven billion people, and speculated about the future of our species. This short book provides a captivating account of the noble, savage, sacred, mundane, heroic and heart-warming events that connect us with our earliest ancestors - an account that you can read in about an hour.

Sapiens: a Graphic History

The Birth of Humankind (Vol. 1)

Signal Books

Volume one of the epic, beautifully illustrated graphic history of humankind, based on Yuval Noah Harari's internationally bestselling phenomenon *Sapiens: A Graphic History*, *The Birth of Humankind* is the story of how an insignificant ape became the ruler of planet Earth, capable of splitting the atom, flying to the Moon, and manipulating the genetic code of life. With Yuval Noah Harari as your guide, and accompanied by characters

like Prehistoric Bill, Dr. Fiction, and Detective Lopez, you are invited to take a ride on the wild side of history. The graphic format offers readers a new intellectual and artistic exploration of the past. Human evolution is reimagined as a tacky reality TV show. The first encounter between Sapiens and Neanderthals is explored through the master-pieces of modern art. The extinction of the mammoths and saber-toothed tigers is retold as a "whodunit" movie. Sapiens: A Graphic History is a radical, and radically fun, retelling of the story of humankind, bursting with wit, humor, and colorful characters. If you want to know why we are all trapped inside the dreams of dead people--read this book.

Summary

Sapiens by Yuval Noah Harari: A Brief History of Humankind *Independently Published*

Sapiens: A Brief History of Humankind by Yuval Noah Harari (Book Summary)
Important note: This is not the original book. This is a book summary of

Sapiens: A Brief History of Humankind by Yuval Noah Harari About: Our species, Homo sapiens, started as just another, biologically insignificant, animal among countless others, but at some point made a very quick "jump" to domination over other species that has left man anxious, destructive, and often miserable despite all our efforts to be happy. Yuval Noah Harari's book, 'Sapiens, ' traces the origins, mechanisms, and effects of what we think of as "human progress" from small bands of hunter-gatherers 100,000 years ago to the present-day global network through which our species has come to dominate the entire Earth. This bird's-eye view of human history delves into the development of sapiens' social organization and the structural features

of human cultures through which our species has spread, replicated, and evolved, including the breakthroughs of human language with its infinite expressions, the use of the human imagination, and the rise of the concept of a better future that lies just beyond the horizon. Through these mechanisms, our species has evolved socially, rather than biologically, into a species that's increasingly in control of our own destiny. This book considers not only how this evolution has occurred but questions of whether this "progress" has truly been beneficial and how we might, with our awareness of how we got here, decide where we want to go. Here's what you'll learn about in this summary: Although sapiens have not evolved biologically in 100,000 years, we have

experienced radical evolutions in the social order driven by our ability to collectively imagine. History, overall, is moving in the direction of global unity of humankind. None of the outcomes of history have been inevitable, and the flexible nature of the social order may mean that our species can control its destiny. Book Summary of *Sapiens: A Brief History of Humankind* by Yuval Noah Harari Summary by Dean's Library

21 Lessons for the 21st Century

Random House

#1 NEW YORK TIMES BESTSELLER • In *Sapiens*, he explored our past. In *Homo Deus*, he looked to our future. Now, one of the most innovative thinkers on the planet turns to the present to make sense of today's most pressing issues.

"Fascinating . . . a crucial global conversation about how to take on the problems of the twenty-first century."—Bill Gates, *The New York Times Book Review* **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES AND PAMELA PAUL, KQED** How do computers and robots change the meaning of being human? How do we deal with the epidemic of fake news? Are nations and religions still relevant? What should we teach our children? Yuval Noah Harari's *21 Lessons for the 21st Century* is a probing and visionary investigation into today's most urgent issues as we move into the uncharted territory of the future. As technology advances faster than our understanding of it, hacking becomes a tactic of war, and the world feels more polarized than

ever, Harari addresses the challenge of navigating life in the face of constant and disorienting change and raises the important questions we need to ask ourselves in order to survive. In twenty-one accessible chapters that are both provocative and profound, Harari builds on the ideas explored in his previous books, untangling political, technological, social, and existential issues and offering advice on how to prepare for a very different future from the world we now live in: How can we retain freedom of choice when Big Data is watching us? What will the future workforce look like, and how should we ready ourselves for it? How should we deal with the threat of terrorism? Why is liberal democracy in crisis? Harari's unique ability to make sense of where

we have come from and where we are going has captured the imaginations of millions of readers. Here he invites us to consider values, meaning, and personal engagement in a world full of noise and uncertainty. When we are deluged with irrelevant information, clarity is power. Presenting complex contemporary challenges clearly and accessibly, *21 Lessons for the 21st Century* is essential reading. "If there were such a thing as a required instruction manual for politicians and thought leaders, Israeli historian Yuval Noah Harari's *21 Lessons for the 21st Century* would deserve serious consideration. In this collection of provocative essays, Harari . . . tackles a daunting array of issues, endeavoring to answer a persistent question: 'What is happening in the world today, and what

is the deep meaning of these events?"—BookPage (top pick)

SUMMARY OF SAPIENS: A BRIEF HISTORY OF HUMANKIND. DISCLAIMER: This book is a general overview of Sapiens: A Brief History of Humankind. It is intended to be read as a companionship to the

original book, provide a general overview of the contents and concepts within it, and make studying the book less confusing. This summary is not affiliated with the writer or publisher of Sapiens in any way. This is not the original book, and if you intended to purchase the original, it can be found here: <http://amzn.to/2qxORbB> THE HISTORY OF HUMANKIND: Written by Yuval Noah Harari, Sapiens: A Brief History of Humankind explores the cultural evolution of Homo sapiens throughout the ages. It begins with early man, several species under the Homo genus, and continues chronologically through the ages. Harari's explanations of human biology, psychology, and history is connected to the basis that humankind has not evolved in a very

long time, and they are essentially the same hunter gatherers they always have been on a psychological level, only now they're living in an industrial world. THE FOUR MAJOR ERAS: PART ONE: The Cognitive Revolution... where mankind has evolved to have imagination, the basis for creating the fictions and myths that would dominate the creation of societies and bonds between strangers that allow for mass cooperation between human beings. PART TWO: The Agriculture Revolution... how humankind navigated the slow process of domesticating plants and animals, eventually leading to mankind's settlement lifestyle that allowed for the existence of ruling classes. PART THREE: The Unification of Humankind... which covers the creation and acceptance of

money, politics, economics, religion, and the many constructs that truly allows for large civilizations. Within this section is a heavy focus on empires and how they have shaped history ever since imperial ambitions began. PART FOUR: The Scientific Revolution... based around the idea that during the last 500 years the explosion of knowledge and technology as a result of humankind acknowledging their ignorance and lack of answers for everything. Leading up to modern day humans, this section focuses heavily not only on scientific advancements, but how politics, religion, and capitalism shape scientific discoveries for better or worse. WHY THIS SUMMARY? Following Sapiens chapter by chapter, our goal is to condense and simplify without losing the overarching themes that connect

each chapter together. This allows for succinct explanations in the book's exploration of biology, psychology, and culture in a fraction of the time, and is given enough context in easy-to-read language to avoid confusion without requiring a huge time commitment.

Summary of Sapiens

by Yuval Noah Harari - A Brief History of Humankind - A Comprehensive Summary
BookSummaryGr

Summary of Sapiens - A Brief History of Humankind - A Comprehensive Summary
Seventy thousand years ago, there were at least six different human species on earth. They were insignificant animals whose ecological impact was less than

that of fireflies or jellyfish. Today, there is only one human species left: Us. Homo sapiens. But we rule this planet. Sapiens, the book, takes us on a breath-taking ride through our entire human history, from its evolutionary roots to the age of capitalism and genetic engineering, to uncover why we are the way we are. Sapiens focuses on key processes that shaped humankind and the world around it, such as the advent of agriculture, the creation of money, the spread of religion and the rise of the nation state. Unlike other books of its kind, Sapiens takes a multi-disciplinary approach that bridges the gaps between history, biology, philosophy and economics in a way never done before. Furthermore, taking both the macro and micro view, Sapiens conveys not only what happened and

why, but also how it felt for individuals. Sapiens: A Brief History of Humankind is a book by Professor Yuval Noah Harari first published in Hebrew in Israel in 2011, and in English in 2014. Harari cites Jared Diamond's Guns, Germs, and Steel (1997) as one of the greatest inspirations for the book by showing that it was possible to "ask very big questions and answer them scientifically". Here is a Preview of What You Will Get: - A Full Book Summary - An Analysis - Fun quizzes - Quiz Answers - Etc Get a copy of this summary and learn about the book.

By Yuval Noah Harari -- a Brief History of Humankind *Createspace*

Independent Publishing Platform

A Complete Summary of Sapiens: A Brief History of Humankind Seventy thousand years ago, there were at least six different human species on earth. They were insignificant animals whose ecological impact was less than that of fireflies or jellyfish. Today, there is only one human species left: Us. Homo sapiens. But we rule this planet. Sapiens, the book, takes us on a breath-taking ride through our entire human history, from its evolutionary roots to the age of capitalism and genetic engineering, to uncover why we are the way we are. Sapiens focuses on key processes that shaped humankind and the world around it, such as the advent of agriculture, the creation of money, the spread of religion and the rise of the nation state. Unlike

other books of its kind, Sapiens takes a multi-disciplinary approach that bridges the gaps between history, biology, philosophy and economics in a way never done before. Furthermore, taking both the macro and micro view, Sapiens conveys not only what happened and why, but also how it felt for individuals. Sapiens: A Brief History of Humankind is a book by Professor Yuval Noah Harari first published in Hebrew in Israel in 2011, and in English in 2014. Harari cites Jared Diamond's Guns, Germs, and Steel (1997) as one of the greatest inspirations for the book by showing that it was possible to "ask very big questions and answer them scientifically." find the book analyzed to further strengthen your knowledge. In *Sapiens*, you will get some fun multiple choice quizzes, along with answers to help you learn about the book. Get a copy, and learn everything about *Sapiens: A Brief History of Humankind*.

The Ultimate Experience

Battlefield Revelations and the Making of Modern War Culture, 1450-2000 *Springer*

For millennia, war was viewed as a supreme test. In the period 1750-1850 war became much more than a test: it became a secular revelation. This new understanding of war as revelation completely transformed Western war culture, revolutionizing politics, the

personal experience of war, the status of common soldiers, and the tenets of military theory.

The World Until Yesterday

What Can We Learn from Traditional Societies? *Penguin UK*

From the author of No.1 international bestseller *Collapse*, a mesmerizing portrait of the human past that offers profound lessons for how we can live today. Visionary, prize-winning author Jared Diamond changed the way we think about the rise and fall of human civilizations with his previous international bestsellers *Guns, Germs and Steel* and *Collapse*. Now he returns with another epic - and groundbreaking - journey into our rapidly receding past. In

The World Until Yesterday, Diamond reveals how traditional societies around the world offer an extraordinary window onto how our ancestors lived for the majority of human history - until virtually yesterday, in evolutionary terms - and provide unique, often overlooked insights into human nature. Drawing extensively on his decades working in the jungles of Papua New Guinea, Diamond explores how tribal societies approach essential human problems, from childrearing to conflict resolution to health, and discovers we have much to learn from traditional ways of life. He unearths remarkable findings - from the reason why modern afflictions like diabetes, obesity and Alzheimer's are virtually non-existent in tribal societies to the surprising benefits of

multilingualism. Panoramic in scope and thrillingly original, The World Until Yesterday provides an enthralling first-hand picture of the human past that also suggests profound lessons for how to live well today. Jared Diamond is the Pulitzer Prize-winning author of the seminal million-copy-bestseller Guns, Germs, and Steel, which was named one of TIME's best non-fiction books of all time, and Collapse, a #1 international bestseller. A professor of geography at UCLA and noted polymath, Diamond's work has been influential in the fields of anthropology, biology, ornithology, ecology and history, among others.

The Good Hand

A Memoir of Work, Brotherhood, and Transformation in an American Boomtown *Penguin*

"A book that should be read . . . Smith brings an alchemic talent to describing physical labor." —The New York Times Book Review "Beautiful, funny, and harrowing." – Sarah Smarsh, The Atlantic "Remarkable . . . this is the book that Hillbilly Elegy should have been."

—Kirkus Reviews A vivid window into the world of working class men set during the Bakken fracking boom in North Dakota Like thousands of restless men left unmoored in the wake of the 2008 economic crash, Michael Patrick Smith arrived in the fracking boomtown of Williston, North Dakota five years later homeless, unemployed, and desperate for a job. Renting a mattress on a dirty flophouse floor, he slept boot to beard with migrant men who came from all across America and as far away as Jamaica, Africa and the Philippines. They ate together, drank together, argued like crows and searched for jobs they couldn't get back home. Smith's goal was to find the hardest work he could do--to find out if he could do it. He hired on in the oil patch where he toiled

fourteen hour shifts from summer's 100 degree dog days to deep into winter's bracing whiteouts, all the while wrestling with the demons of a turbulent past, his broken relationships with women, and the haunted memories of a family riven by violence. *The Good Hand* is a saga of fear, danger, exhaustion, suffering, loneliness, and grit that explores the struggles of America's marginalized boomtown workers—the rough-hewn, castoff, seemingly disposable men who do an indispensable job that few would exalt: oil field hands who, in the age of climate change, put the gas in our tanks and the food in our homes. Smith, who had pursued theater and played guitar in New York, observes this world with a critical eye; yet he comes to love his coworkers, forming close bonds with

Huck, a goofy giant of a young man whose lead foot and quick fists get him into trouble with the law, and The Wildebeest, a foul-mouthed, dip-spitting truck driver who torments him but also trains him up, and helps Smith "make a hand." *The Good Hand* is ultimately a book about transformation--a classic American story of one man's attempt to burn himself clean through hard work, to reconcile himself to himself, to find community, and to become whole.

Special Operations in the Age of Chivalry, 1100-1550 *Boydell Press*

The author of the international bestseller *Sapiens: A Brief History of Humankind* looks at covert operations and assassination plots in the medieval period, matching anything to be found in

our own era.

Summary Of "Sapiens: A Brief History Of Humankind - By Yuval Noah Harari" *Sapiens Editorial*

ABOUT THE ORIGINAL BOOK: "Sapiens" presents a pleasant and simple narrative about the extraordinary story of the evolution of mankind. In this work, it shows a detailed vision that everything we learn in school about history doesn't teach us anything about how our species spread throughout the world. How big cities and empires occurred, what made us believe in Gods, why did money arise? From that curious and interesting past, we are also presented with a projection into the future, towards the millenniums to come. It is a well narrated chronical of life. From the first humans that inhabited

the earth, all the way to the considerable progress like the great cognitive, agricultural and scientific revolutions. This work has drawn interest from universities and the public. Making the young writer an international celebrity.

The Crisis of Liberalism and the Theatre of Terror

Summary of Sapiens

A Brief History of Humankind by Yuval Noah Harari *Summareads Media LLC*

Imagine Another Species of Human Standing Right In Front of You... Weird, right? Did you know that we are called

Homo Sapiens... .. and there were many more species of human in the past? Ever wondered why we own Earth as we know it today? We're not the best swimmer, runner & we can't even fly. Interesting, isn't it? When did we begin to learn how to speak? When did we begin to believe in religion? What ACTUALLY happened to us? Sapiens is written by Yuval Noah Harari and first published in 2011. Since publication, it has been highly acclaimed and heavily criticized at the same time. Afterall, we're going back 70,000 years ago. Here's what you'll discover... --- Chapter 5: Why the Agricultural Revolution Wasn't the Book We Think It Was --- Chapter 7: An Impossible Amount of Numeric Data (and what we did) --- Chapter 8: The Myth of Race and Gender (let's go back and dig deep!) --- Chapter

10: Money: A Universal Truth (since when was money created and why?) --- Chapter 12: The Best and Worst of Religion --- Chapter 15: The Evolution of Science Through Empire --- And so much more. If you're ready to learn more about the history of humans and understand more of why things are the way they are, click on the BUY NOW button and start reading this summary book NOW! ----- Why Grab Summareads' Summary Books? --- Unparalleled Book Summaries... learn more with less time. --- Bye Fluff... get the vital principles of a full-length book in a limited time. --- Come Comprehensive... handy companion that can be reviewed side by side the original book --- Hello Facts... we will never inject our opinions into the original works of

Guns, Germs, and Steel: The Fates of Human Societies (20th Anniversary Edition) *W. W. Norton & Company*

"Fascinating.... Lays a foundation for understanding human history."—Bill

Gates In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and

the Commonwealth club of California's Gold Medal.

The Invention of Science

A New History of the Scientific Revolution *Harper Collins*

"Captures the excitement of the scientific revolution and makes a point of celebrating the advances it ushered in."
—Financial Times A companion to such acclaimed works as *The Age of Wonder*, *A Clockwork Universe*, and *Darwin's Ghosts*—a groundbreaking examination of the greatest event in history, the Scientific Revolution, and how it came to change the way we understand ourselves and our world. We live in a world transformed by scientific discovery. Yet today, science and its

practitioners have come under political attack. In this fascinating history spanning continents and centuries, historian David Wootton offers a lively defense of science, revealing why the Scientific Revolution was truly the greatest event in our history. The *Invention of Science* goes back five hundred years in time to chronicle this crucial transformation, exploring the factors that led to its birth and the people who made it happen. Wootton argues that the Scientific Revolution was actually five separate yet concurrent events that developed independently, but came to intersect and create a new worldview. Here are the brilliant iconoclasts—Galileo, Copernicus, Brahe, Newton, and many more curious minds from across Europe—whose studies of

the natural world challenged centuries of religious orthodoxy and ingrained superstition. From gunpowder technology, the discovery of the new world, movable type printing, perspective painting, and the telescope to the practice of conducting experiments, the laws of nature, and the concept of the fact, Wotton shows how these discoveries codified into a social construct and a system of knowledge. Ultimately, he makes clear the link between scientific discovery and the rise of industrialization—and the birth of the modern world we know.

Summary of Sapiens

A Brief History of Humankind by Yuval Noah Harari

Sapiens: A Brief History of Humankind by Yuval Noah Harari - Book Summary - Readtrepreneur (Disclaimer: This is NOT the original book) How did we make it this far? We, Homo sapiens rule the world because we are the only animal that believe in the power of imagination. Dr Yuval Noah Harari's book on Sapien is a masterpiece which is truly unique on its own. Summary Yuval Noah Harari's Sapiens

A Brief History of Mankind *Createspace Independent Publishing Platform*

This is a summary of Yuval Noah Harari's Sapiens: A Brief History of Mankind The groundbreaking book, written by a well-known historian, reveals how human beings were created and evolved. It also takes a deep look into the history and biology that have come to define us while enhancing what we understand by "humanity." How did our species

succeed in the battle for dominance? Why did our foraging ancestors come together to create cities and kingdoms? How did we come to believe in gods nations and human rights to trust money books and laws and to be enslaved by bureaucracy timetables and consumerism? And what will our world be like in the millennia to come? Available in a variety of formats, this summary is aimed for those who want to capture the gist of the book but don't have the current time to devour all 498 pages. You get the main summary along with all of the benefits and lessons the actual book has to offer. This summary is not intended to be used without reference to the original book.

Homo Deus

A Brief History of Tomorrow *Harper Perennial*

Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable

forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial

life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future.

Summary of Sapiens

A Brief History of Humankind

Summary of Sapiens: A Brief History of Humankind by Yuval Noah Harari - Book Summary - OneHour Reads From where did the world appear? Is the creation story true? Why is Man the way he is? Were there men, before you and I? Would there be other species after you

and me? Religion & Politics: what is their origin? And why do they rule our world so strongly? Oh well! You might be in for a shocker! If you were told today that you come from a lineage of animals, and probably have some apes and chimpanzees as long-lost cousins, what would you think? If you knew that the creation story was just make-believe invented to control your world, what would you say? What if you were told that your species would one day come to an end? All of these and many more are the topics explored in "SAPIENS." In the book "Sapiens", Yuval Noah Harari discusses all you need to know about who you are and where you come from, and debunks the many myths that have lived with us until now. This book contains a comprehensive, well detailed

summary and key takeaways of the original book by Yuval Noah Harari. It summarizes the book in detail, to help people effectively understand, articulate and imbibe the original work by Noah. Hey, Kiddo: A Graphic Novel
Scholastic Inc.

The powerful, unforgettable graphic memoir from Jarrett Krosoczka, about growing up with a drug-addicted mother, a missing father, and two unforgettably opinionated grandparents. A National Book Award Finalist! In kindergarten, Jarrett Krosoczka's teacher asks him to draw his family, with a mommy and a daddy. But Jarrett's family is much more complicated than that. His mom is an

addict, in and out of rehab, and in and out of Jarrett's life. His father is a mystery -- Jarrett doesn't know where to find him, or even what his name is. Jarrett lives with his grandparents -- two very loud, very loving, very opinionated people who had thought they were through with raising children until Jarrett came along. Jarrett goes through his childhood trying to make his non-normal life as normal as possible, finding a way to express himself through drawing even as so little is being said to him about what's going on. Only as a teenager can Jarrett begin to piece together the truth of his family, reckoning with his mother and tracking down his father. Hey, Kiddo is a profoundly important memoir about growing up in a family grappling with addiction, and finding the art that helps

you survive.

The Most Dazzling Girl in Berlin

HarperCollins

A fascinating historical novel about Hilde, an orphan who experiences Berlin on the cusp of World War II as she discovers her own voice and sexuality, ultimately finding a family when she gets a job at a gay cabaret, by award-winning author Kip Wilson. On her eighteenth birthday, Hilde leaves her orphanage in 1930s Berlin, and heads out into the world to discover her place in it. But finding a job is hard, at least until she stumbles into Café Lila, a vibrant cabaret full of expressive customers. Rosa, one of the club's waitresses and performers, immediately takes Hilde under her wing. As the café denizens slowly embrace

Hilde, and she embraces them in turn, she discovers her voice and her own blossoming feelings for Rosa. But Berlin is in turmoil. Between the elections, protests in the streets, worsening antisemitism and anti-homosexual sentiment, and the beginning seeds of unrest in Café Lila itself, Hilde will have to decide what's best for her future . . . and what it means to love a place on the cusp of war.

Summary: Sapiens - a Brief History of Humankind by Yuval Noah Harari

An EXECUTIVEGROWTH Summary: Sapiens - A Brief History of Humankind. Note: this is a SUMMARY. Sapiens became a New York Times bestseller for good reason. Unlike other macroscopic reviews of human history, Sapiens

combines the best research into history with recent discoveries in biology and archaeology, and complimentary disciplines of science. It provides a unique point of view on how we got to where we are today - and what that means for us as a species. Sapiens traces the development of consciousness, above all else. 100,000 years ago Homo Sapiens were an insignificant animal - but today we dominate the planet. At some point the evolution of thinking superseded biological evolution. Much of our 'success' hinges on the importance of the myths and legends - the fictions of our imagination - that have played such a vital role in the development of culture, ideology, religion, economics, science, and ultimately - the mind. Why

read the summary? Reading is primarily an investment of your time with hopes of gaining useful knowledge and perspective. The staggering statistics shows that a majority of books purchased today are not read to completion. As such, reading our summary is the perfect way to cover the full material and grasp the essential insights of Dr. Harari's bestseller, Sapiens. Why read EXECUTIVEGROWTH Summaries in particular? EXECUTIVEGROWTH Summaries in a snap: The best-quality summaries on Amazon, guaranteed Team of professional native-English writers and editors (a huge issue on Amazon; check the reviews of ANY other summary book company to see for yourself) Engaged CEO and responsive team committed to

your personal growth and making your reading experience superb Bonus 30-Day Action Plan to implement the book's knowledge to your life Our summaries are crafted for high-achievers who have a full plate, with little time to spare, yet still have the insatiable appetite to keep learning and growing. Simply put, our summaries provide the fastest way to increase perspective and productivity, guaranteed. Our CEO personally reads every original book and decides which will provide the greatest value for people today. We only curate summaries whose original books we absolutely love and are convinced have a "high personal-growth potential." We are also committed to providing the next step after your reading experience - an actionable 30-Day Plan to integrate the

summary's knowledge into your life. Also, every single summary book is written and edited by our experienced team of native English speakers - not outsourced to low-budget, English-as-a-Second-Language (ESL) writers, as is industry practice. Yesterday already passed - the next best opportunity to invest in yourself is now. And for less than a cup of coffee (a salted caramel mocha costs \$5.57) you can set yourself apart and acquire a new understanding of human history that very few hold. **DISCLAIMER:** This is not the original book: *Sapiens: A Brief History of Humankind* by Yuval Noah Harari. This is a SUMMARY of the book's main ideas, capturing the most important insights of each chapter, the flavor of the original work, as well as a synopsis of the central

arguments. You can buy the original book, Sapiens, in the following link: <https://amzn.to/2HripjC>

India, that is Bharat

Coloniality, Civilisation, Constitution *Bloomsbury Publishing*

India, That Is Bharat, the first book of a comprehensive trilogy, explores the influence of European 'colonial consciousness' (or 'coloniality'), in particular its religious and racial roots, on Bharat as the successor state to the Indic civilisation and the origins of the Indian Constitution. It lays the foundation for its sequels by covering the period between the Age of Discovery, marked by Christopher Columbus' expedition in 1492, and the

reshaping of Bharat through a British-made constitution-the Government of India Act of 1919. This includes international developments leading to the founding of the League of Nations by Western powers that tangibly impacted this journey. Further, this work also traces the origins of seemingly universal constructs such as 'toleration', 'secularism' and 'humanism' to Christian political theology. Their subsequent role in subverting the indigenous Indic consciousness through a secularised and universalised Reformation, that is, constitutionalism, is examined. It also puts forth the concept of Middle Eastern coloniality, which preceded its European variant and allies with it in the context of Bharat to advance their shared antipathy towards the Indic worldview. In order to

liberate Bharat's distinctive indigeneity, 'decoloniality' is presented as a civilisational imperative in the spheres of nature, religion, culture, history, education, language and, crucially, in the realm of constitutionalism.

Book Review: Sapiens by Yuval Noah Harari

A brief history of humankind *50Minutes.com*

It can be hard for busy professionals to find the time to read the latest books. Stay up to date in a fraction of the time with this concise guide. As its name suggests, Sapiens: A Brief History of Humankind seeks to trace the history of Homo Sapiens from its earliest evolution, when it was one of several human

species coexisting on earth, to the 21st century. This sweeping narrative takes in the Agricultural Revolution, the development of language, the rise of money and much more, showing us not just where we have come from but also where we might be going. The book became a publishing phenomenon when it first appeared in English in 2014: it made The New York Times bestseller list and received the National Library of China's Wenjin Book Award for the best published that year. It has been translated into over forty languages to date. This book review and analysis is perfect for:

- Students of anthropology and world history
- Anyone with an interest in the history of humankind
- Readers looking for an accessible introduction to anthropology and

evolutionary biology About
