Embedded Systems for Smart Appliances and Energy ...

Dr. William Stallings (MIT) points out that perhaps most electrically powered devices have an embedded system. He even suggests that virtually every electric device will feature one in the near future. This relates to the Internet of Things (IoT); It ranks as a major accelerator in the spread of embedded technologies. Embedded systems are subdivided into the categories: stand alone, real time, networked and mobile. All four types of embedded systems are in daily life. Here are 30 examples of ...
