Facing Diversity in Child Foreign Language Education *Springer Nature*

This edited book uses the concept of diversity in child foreign language education as a major organizing principle. Since a foreign language, most typically English, is taught globally to an increasing number of children, the variability in the process and varied learning outcomes are inescapable phenomena. This book has been constructed on the premise that heterogeneity, first, concerns young language learners, who due to the disparity in the pace of development need appropriately tailored educational solutions, and, second, it refers to a diversity of contexts in which learning takes place. The contexts can be defined on a macroscale (e.g. different countries), mesoscale (e.g. different institutions), and microscale (e.g. specific learner groups). The book consists of four thematic strands. In Part One the learner-internal causes of heterogeneity of young language learners are clarified. Part Two presents a sample of classroom studies in which learner variables, such as gender, learner preferences, and special needs are taken into account. Part Three looks at teaching materials and how they meet learners’ needs. Finally, Part Four highlights diversity issues that teachers should be prepared to face.

Second Language Acquisition and the Younger Learner

Child's play? *John Benjamins Publishing*

This new volume of work highlights the distinctiveness of child SLA through a collection of different types of empirical research specific to younger learners. Characteristics of children’s cognitive, emotional, and social development distinguish their experiences from those of adult L2 learners, creating intriguing issues for SLA research, and also raising important practical questions regarding effective pedagogical techniques for learners of different ages. While child SLA is often typically thought of as simple (and often enjoyable and universally effortless), in other words, as “child’s play”, the complex portraits of young second language learners which emerge in the 16 papers collected in this book invite the reader to reconsider the reality for many younger learners. Chapters by internationally renowned authors together with reports by emerging researchers describe second and foreign language learning by children ranging from pre-schoolers to young adolescents, in home and school contexts, with caregivers, peers, and teachers as interlocutors.

Assessing the Language of Young Learners *Equinox Publishing (Indonesia)*

This volume offers new insights into the assessment of the language of Young Learners (YLS). YLS are defined here as being from 5 to 17 years, and are treated as three distinct subgroups: younger children (5/6 to 8/9 years), older children (8/9 to 12/13 years) and teenagers (12/13 to 17 years). The first half addresses fundamental issues, beginning with the characteristics of YLS and how these are manifested in first language development. The authors consider the potential ability of each age group to perform in a second or foreign language, proposing a rough age-related correspondence with CEFR levels. Finally, principles of assessment, specifically formative assessment and testing, are presented in the light of linguistic, cognitive and social development. The second half focuses on testing a range of 'skills'. Theoretical models of performance are introduced, followed by a practical analysis of approaches to the testing of each skill for the three age groups, illustrated with examples. The authors conclude by summing up developmental characteristics of each age group, and their implications for language testing. The book is intended for a wide readership within the field of teaching and assessing the language of young learners. Researchers are offered scope for further investigation of what emerges from the discussion, while practitioners will hopefully find support in their day-to-day work with YLS.

Effective language teaching can contribute to young learners’ cognitive growth, develop their problem-solving skills, enhance their comprehension abilities, and provide children with the satisfaction of succeeding in the challenge of learning a foreign language. The current literature indicates that further material is needed to provide professionals with different classroom situations and enhance the art of teaching children. Teaching Practices and Equitable Learning in Children's Language Education focuses on various perspectives of efficient practices, approaches, and ideas for professional development in the field of young language learners. The chapters in this book link the theoretical understanding and practical experience of teaching children languages by concentrating on teaching practices, material design, classroom management, reading, speaking, writing, and more. But now it looks like his days as a troublemaker are over. Now Nick is in Mrs Granger's class - she who has X-ray vision - and everyone knows that nobody gets away with anything in her classroom. To make matters worse, Mrs Granger is also fanatical about the dictionary - which Nick thinks is so boring. But then inspiration strikes and Nicholas invents his greatest plan yet: to create a new word. From now on, a pen is no

longer a pen - it's a frindle. It doesn't take long to catch on and soon the excitement has spread well beyond the school and town . . . but frindle doesn't belong to Nick anymore, it has a life of it's own, and all Nick can do now, is sit back and watch what happens.

Assessing the Young Learners' Progress: Tests *GRIN Verlag*

Seminar paper from the year 2005 in the subject English - Pedagogy, Didactics, Literature Studies, grade: 2,0, University of Wuppertal, course: Teaching English to very young children, 10 entries in the bibliography, language: English, abstract: In 1999, Rea-Dickens and Rixon conducted a survey about the relationship between assessment and learning. 120 European teachers and teacher trainers were asked if the main purpose of their assessment was to help their teaching, and 97% answered in the affirmative. Rea-Dickens and Rixon examined afterwards what the teachers really assessed and how they did so. They found a strong "mismatch between curricular aims, pedagogy and test content" (Cameron, Lynne.Teaching languages to very young learners. Cambridge University press.2001. page 217). The assessment focused mainly on the children's achievements but neglected on other curricular aims such as language and social awareness. The assessment of young learners should serve teaching by providing feedback on the children's learning progress, so that the content and the difficulty of subsequent teaching units can be effectively adjusted to the learners' needs. This paper offers the reader an overview about the theoretical ideas and principles which should be kept in mind when implementing an assessment. Furthermore the guidelines of

lower Saxony are introduced. They illustrate the expectations of the German school system towards assessment in class. Afterwards the paper gives an overview about psycholinguistic tests such as "Blitztest" and "F-Test." Additionally, the paper answers the question of origin and purpose of the Cambridge Young Learners Test. Finally, material which should support the teacher in the efficiency assessment of the pupils is represented, considering the example of "Ginger."

Handbook of Research on Cultivating Literacy in Diverse and Multilingual Classrooms *IGI Global*

Literacy has traditionally been associated with the linguistic and functional ability to read and write. Although literacy, as a fundamental issue in education, has received abundant attention in the last few decades, most publications to date have focused on monolingual classrooms. Language teacher educators have a responsibility to prepare teachers to be culturally responsive and flexible so they can adapt to the range of settings and variety of learners they will encounter in their careers while also bravely questioning the assumptions they are encountering about multilingual literacy development and instruction. The Handbook of Research on Cultivating Literacy in Diverse and Multilingual Classrooms is an essential scholarly publication that explores the multifaceted nature of literacy development across the lifespan in a range of multilingual contexts. Recognizing that literacy instruction in contemporary language classrooms serving diverse student populations must go beyond developing reading and writing abilities, this book sets out to explore a wide range of literacy dimensions. It offers unique perspectives through a critical reflection on issues related to power, ownership, identity, and the social construction of literacy in multilingual societies. As a resource for use in language teacher preparation programs globally, this book will provide a range of theoretical and practical perspectives while creating space for pre- and in-service teachers to grapple with the ideas in light of their respective contexts. The book will also provide valuable insights to instructional designers, curriculum developers, linguists, professionals, academicians, administrators, researchers, and students.
