Diseases of the tropics and subtropics have been known since ancient times.

Tropical disease | Britannica

Tropical diseases are diseases that are prevalent in or unique to tropical and subtropical regions. The diseases are less prevalent in temperate climates, due in part to the occurrence of a cold season, which controls the insect population by forcing hibernation. However, many were present in northern Europe and northern America in the 17th and 18th centuries before modern understanding of ...

A team has demonstrated for the first time that cannabidiol induces the expression of heme oxygenase 1, an enzyme with antioxidant and anti-inflammatory properties, in the main cells on the top layer of the skin, called keratinocytes. They found that this is done by reducing or silencing the protein known as BACH1.
