Japanese Joinery Wood Tools

Centuries before the invention of screws and fasteners, Japanese carpentries created their own beautiful and effective woodworking joints (known as joinery), closely related to Japanese architecture. It is the work of tightly slotting together pieces of timber or lumber to hold together and produce more complicated items.

A Beginner's Guide to Japanese Joinery and How It's Taking ...

Nowhere is this more apparent than Japan, a nation with an architectural tradition like no other. Long before screws and metal fastenings became de rigueur, Japanese builders had mastered the art of wood joinery. Using techniques handed down in guilds and families for centuries, Japanese builders would fit wooden beams together without any external fasteners.

Japanese woodworking can be categorized into two parts, actually. One is to first form a frame by joining elongated objects such as posts and beams, and then fill the space in between with a panel or something similar. This is the typical method for building a building. The other way is to join several panels together.

Online Japanese woodworking course - DIY Japanese Joinery

Japanese Wood Joinery. “ Sashimono ” is a technique for assembling furniture and other wooden items without nails, using both simple and highly complex wood joints. Mortises or grooves called ‘hozo’ are carved into the wood in order to join two boards in a blind joint that’s not visible from the surface. The term “Sashimono” derives from the traditional practice of using a woodwork ruler called a “monosashi” to carefully measure timber materials.
