Chemistry: Inorganic Qualitative Analysis in the Laboratory *Elsevier*

Chemistry: Inorganic Qualitative Analysis in the Laboratory is a textbook dealing with qualitative analysis in the laboratory, as well as with the process of anion and cation analysis. The book presents an overview of the subject of inorganic qualitative analysis, including as the equipment, reagents, and procedures that are going to be used in the laboratory. Preliminary experiments include the classification of precipitates, handling precipitates, separation techniques, flame tests, Brown ring test, solvent extraction. The text also describes in detail how to prepare the experiment for anion and cation analysis such as testing for water solubility in a solid sample or the sodium carbonate

treatment of a water-soluble sample. The book also explains the qualitative analysis for anions in preliminary and specific tests. In the qualitative analysis for cations, the student follows different procedures for Cation Groups I, II, III, IV or V. For example, the ions of Cation Group V cannot be precipitated by any Cation Groups I-IV reagents, nor by any single group reagent. The textbook is suitable for both chemistry teachers and freshmen students.

A Laboratory Manual of Qualitative Organic Analysis *Cambridge University Press*

First published in 1955 as the third edition of a 1946 original, this manual presented students with a logical method for the identification of the

commoner types of organic compound. Numerous amendments were incorporated for this version. It will be of value to anyone with an interest in organic chemistry.

Laboratory Manual for Principles of General Chemistry *Wiley*

Offers pertinent information on rules and safety in the lab. 17 basic laboratory techniques present proper procedures for handling chemicals and apparatus along with methods unique to qualitative analysis. Each experiment contains five sections: objectives, introduction, experimental procedure, prelaboratory assignment, report sheet. This edition features new and more detailed arrangements and labeling, two-page, four-color plate as well as numerous

new, revised and challenging experiments.

Interactive Qualitative Analysis

A Systems Method for Qualitative Research *SAGE*

'Students in qualitative classes often have a difficult time grasping abstract concepts related to data collection, coding, and analysis. One benefit of [this book] is the systematic manner in which all of these take place. This text does a nice job of creating a system of checks and balances for the qualitative researcher' - Justin M Laird, SUNY Brockport Aimed at helping students unscramble the mysteries of qualitative data collection, coding, and analysis, this book integrates and reconciles theory

and methods by showing how to use a systematic, qualitative technique: interactive qualitative analysis.

Fundamentals of Chemistry *Academic Press*

Fundamentals of Chemistry, Fourth Edition covers the fundamentals of chemistry. The book describes the formation of ionic and covalent bonds; the Lewis theory of bonding; resonance; and the shape of molecules. The book then discusses the theory and some applications of the four kinds of spectroscopy: ultraviolet, infrared, nuclear (proton) magnetic resonance, and mass. Topics that combine environmental significance with descriptive chemistry, including atmospheric pollution from automobile

exhaust; the metallurgy of iron and aluminum; corrosion; reactions involving ozone in the upper atmosphere; and the methods of controlling the pollution of air and water, are also considered. Chemists and students taking courses related to chemistry and environmental chemistry will find the book invaluable.

Course Success in the Undergraduate General Chemistry Lab *Logos Verlag Berlin GmbH*

Stetig hohe Studienabbruchquoten in den MINT-Fächern an deutschen Hochschulen, welche auch aus geringem Kurserfolg in einführenden Laborpraktika resultieren könnten, und die wachsende Kritik an der Qualität und Wirksamkeit ebendieser machen eine eingehende Betrachtung von Laborpraktika

notwendig. Diese Studie untersuchte die Lernziele des Laborpraktikums Allgemeine Chemie für Lehramtsstudierende im ersten Semester sowie Faktoren für den Kurserfolg, um daraus Aussagen über den Stellenwert von Laborpraktika in der universitären Bildung, insbesondere für langfristigen Studienerfolg, abzuleiten. Dazu wurde ein theoretisches Modell zu Grunde gelegt, welches das Vorwissen der Studierenden und die Lernzielpassung zwischen Studierenden und Lehrenden als zwei entscheidende Faktoren für Kurserfolg berücksichtigt. Constantly high student dropout rates in STEM subjects at German universities, which could be the result of low course success in introductory laboratory courses among other things and

increasing criticism about their quality and effectiveness necessitate these laboratory courses to be examined thoroughly. This study investigated the learning goals of the General Chemistry laboratory course for first-year students in teacher training and factors for course success in order to make statements about the significance of laboratory courses for university education, particularly for long-term study success. For this purpose, a theoretical model that assumes the students prior knowledge and learning goal alignment between students and their lab instructors to be two defining factors for lab course success was used as a framework.

Reporting Qualitative Research in

Psychology

How to Meet APA Style Journal Article Reporting Standards

American Psychological Association (APA)

"Reporting standards are guidelines that describe how to communicate findings clearly in journal articles so that readers can access and understand the story of the research endeavor. Recognizing that reporting standards can aid authors in the process of writing and evaluating manuscripts and editors and reviewers in the process of evaluating those manuscripts, the Publications and Communications (P&C) Board of the American Psychological Association (APA) invited two task forces of researchers to develop standards for

reporting quantitative and qualitative research in journal articles. The Quantitative Journal Article Reporting Standards Working Group developed standards for quantitative research, and a separate book details those standards. This book discusses the reporting standards. It permits the space to expand on the ideas in those standards and to articulate the rationale behind each. It articulates decisions one may need to make as an author as one decides how to present their work. It also provides examples to illustrate a strong presentation style, and these can serve as helpful models. It provides the conceptual undergirding for the reporting decisions that authors make during the writing process. The book considers the typical sections of a

qualitative research paper⁷the introductory sections, Method, Results, and Discussion. Guidance is provided for how to best present qualitative research, with rationales and illustrations. The book presents reporting standards for qualitative meta-analyses, which are integrative analyses of findings from across primary qualitative research. The book includes a discussion of objectivist and constructivist rhetorical styles in research reporting."--Preface. (PsycINFO Database Record (c) 2020 APA, all rights reserved).

Global Geographical Heritage, Geoparks and Geotourism

Geoconservation and Development *Springer Nature*

This book explores the geographical, geomorphological, ecological, touristic and socioeconomic aspects of natural heritage, argues for the dynamic conservation of that heritage and explains its key characteristics, promotion, conservation and management to achieve sustainable

development goals. Emerging concepts such as geodiversity, geographical heritage sites, geomonuments, geoparks and geotourism are increasingly being used by conservationists. At present, the development of geoparks is a major global theme involving the application of geosciences to promote the inclusive growth of society and the protection and conservation of our unique geoheritage. Currently, there are 147 UNESCO global geoparks across 41 countries, in addition to a number of national-level geoparks. Pursuing a holistic approach towards such sites will sensitise the general public to the need for geoconservation of significant geosites and promote it through geotourism. It is a crucial issue, as various countries around the world are eager to develop their geoparks and

are working for the conservation of geoheritage sites at the national level. This unique book gathers contributions from 15 countries in the form of case studies analysing the realities on of geographical heritage, geoparks and geotourism. The respective chapters address the role of geoparks as essential tools for education, recreation and nature conservation. Given its scope, the book offers a valuable guide for geoscientists, planners, policymakers, civil society and anyone concerned about the conservation of geoheritage sites and geoparks for a sustainable future Earth.

Understanding the Environmental Debate *Routledge*

Ozone-friendly, recyclable, zero-waste, elimination of toxic chemicals - such environmental ideals are believed to offer solutions to the environmental

crisis. Where do these ideals come from? Is the environmental debate communicating the right problems? Eco-Facts and Eco-Fiction examines serious errors in perceptions about human and environmental health. Drawing on a wealth of everyday examples of local and global concerns, the author explains basic concepts and observations relating to the environment. Removing fear of science and technology and eliminating wrong perceptions lead to a more informed understanding of the environment as a science, a philosophy, and a lifestyle. By revealing the flaws in today's environmental vocabulary, this book stresses the urgent need for a common language in the environmental debate. Such a common language encourages the effective communication
