Renewable Resource Definition

One study estimates that renewable energy sources typically emit about 50g or less of CO₂ emissions per kWh over their lifetime, compared to about 1000 g CO₂/kWh for coal and 475 g CO₂/kWh for natural gas. Most of the lifecycle emissions from fossil generators occur from fuel combustion, but also come from raw materials extraction, construction, fuel processing, plant

operation and decommissioning of facilities.

Setting the Record Straight About Renewable Energy | World ...

On the one hand, wood is a renewable resource – provided it comes from sustainably managed forests. Wood pellets and compressed briquettes are made from by-products of the wood processing industry and so arguably it's recycling waste. Compressed biomass fuels produce more energy than logs too.

Renewable Energy | Types, Forms & Sources of Renewable ...

Renewable energy is energy derived from natural resources that replenish themselves in less than a human lifetime without depleting the planet's resources. These resources – such as sunlight, wind, rain, tides, waves, biomass and thermal energy stored in the earth's crust – are available in one form or another nearly everywhere.

Why is renewable energy important? - REN21

Forest management needs to be tailored to local and regional realities. Yet, these practices must aim at increasing carbon sink and carbon storage, while providing an alternative to fossil-fuels through better use of renewables and sustainable products, and ultimately make our forests more resilient to natural occurrences (forest fires, wind storms, pests and diseases).

Panorama - Active Sustainable Forest Management - A Key ...

Renewable Energy. The emergence of the renewable energy sector offers a potential new revenue stream for forest owners, driven by climate control policies and targets for diversifying the nation's generating capacity. Moreover, government grants and institutional capital are available for capital investment in heating and power plants fuelled by renewables, whether these be wind power, hydro power or forest biomass.
