Conceptual semantics is a framework for semantic analysis developed mainly by Ray Jackendoff in 1976. Its aim is to provide a characterization of the conceptual elements by which a person understands words and sentences, and thus to provide an explanatory semantic representation. Explanatory in this sense refers to the ability of a given linguistic theory to describe how a component of language is acquired by a child. Recently, conceptual semantics in particular, and lexical semantics in general

Only after the common meaning is established, structural information, or details about the object, can come into discussion. When two people speak, the information transfer is possible because both

brains, the sender and the recipient relate to the same “reality”, be that the real world or some abstract world like mathematics or feelings.

Structure vs. Semantics

Main article: Conceptual semantics. This theory is an effort to explain properties of argument structure. The assumption behind this theory is that syntactic properties of phrases reflect the meanings of the words that head them. With this theory, linguists can better deal with the fact that subtle differences in word meaning correlate with other differences in the syntactic structure that the word appears in.

Semantics - Wikipedia

Semantics, or meaning expressed through language, provides indirect access to the underlying conceptual structure, but meaning is notoriously difficult to measure, let alone parameterize. Here, we provide an empirical measure of semantic proximity between concepts using cross-linguistic dictionaries to translate words to and from languages carefully selected to be representative of worldwide diversity.
