**Engineering
Fundamentals of the
Internal Combustion
Engine ...**

An internal combustion
engine (ICE) is a heat
engine in which the
combustion of a fuel
occurs with an oxidizer
(usually air) in a
combustion chamber
that is an integral part
of the working fluid
flow circuit. In an
internal combustion
engine, the expansion
of the high-
temperature and high-
pressure gases
produced by
combustion applies
direct force to some
component of the
engine.
