Natural Background Radiation. Natural background radiation includes radiation produced by the Sun, lightnings, primordial radioisotopes or supernova explosions etc. Man-Made Sources of Radiation. Man-made sources include medical uses of radiation, residues from nuclear tests, industrial uses of radiation etc.

What is Man-made Sources of Radiation - Definition

Environmental radioactivity is produced by radioactive materials in the human environment. While some radioisotopes, such as strontium-90 and technetium-99, are only found on Earth as a result of human activity, and some, like potassium-40, are only present due to natural processes, a few isotopes, e.g. tritium, result from both natural processes and human activities. The concentration and location of some natural isotopes, particularly uranium-238, can be affected by human activity.

Environmental radioactivity - Wikipedia
