One of the historical motivations for sheaves have come from studying complex manifolds, complex analytic geometry, and scheme theory from algebraic geometry. Sheaf (mathematics) - Wikipedia

Both logic and geometry deal with information. Logic deals with information about the truth of statements, and geometry deals with information about location. Grothendieck toposes connect logic and geometry along this line. The simplest case it that of the topos of sheaves over a topological space: here the truth value of any proposition is an open subset of the topological space.
