Safety-II in Practice: Developing the Resilience Potentials by Erik Hollnagel Safety-I is defined as the freedom from unacceptable harm. The purpose of traditional safety management is therefore to find ways to ensure this 'freedom'. But as socio-technical systems steadily have become larger and less tractable, this has become harder to do.

Safety-II in Practice: Developing the Resilience Potentials

Safety-II changes safety management from protective safety and a focus on how things can go wrong, to productive safety and a focus on how things can and do go well. For Safety-II, the aim is not just the elimination of hazards and the prevention of failures and malfunctions but also how best to develop an organisation's potentials for resilient performance - the way it responds, monitors, learns, and anticipates.

Safety-II in practice: developing the resilience ...

This corresponds to a view of safety, called Safety-II, which defines safety as the ability to succeed under varying conditions. The understanding of everyday functioning is therefore a necessary prerequisite for the understanding of the safety performance of an organisation. (Under development, but you may also want to check the book.)

Safety-I and Safety-II

In Safety-II the purpose of investigations changes to become an understanding of how things usually go right, since that is the basis for explaining how things occasionally go wrong. Risk assessment tries to understand the conditions where performance variability can become difficult or impossible to monitor and control.

From Safety-I to Safety-II: A White Paper

Safety-II is built on a substantial theoretical foundation. Unlike many populist management fads, it is not a money-spinning package or trade-marked commercialism. It is built on decades of research and practice in safety, human factors and - over the past ten years - resilience engineering.

Safety-II in Practice on Apple Books

Safety-II may not be universally recognised but is becoming more

so, and can be seen as ‘paradigmatic’ in nature, or at least as an alternative worldview that is becoming, or will become, a collective mindset. This “for a time“-ness is important, as is the set of problems and solutions. The psychologist George Kelly (1955) talked about a ‘range of convenience’ to refer to the range of things or events to which a construct may be applied with maximum predictive efficiency.

Mind your Mindset: Safety-I and Safety-II | Humanistic Systems

Safety-II changes safety management from protective safety and a focus on how things can go wrong, to productive safety and a focus on how things can and do go well. For Safety-II, the aim is not just the elimination of hazards and the prevention of failures and malfunctions but also how best to develop an organisation’s potentials for resilient performance – the way it responds, monitors, learns, and anticipates.
