### **Attention, Attitude, and Affect in Response To Advertising ...**

This latter work argues that attention amplifies attitude information and so has beneficial effects for positively valenced information but detrimental effects for negatively valenced information. For example, when choosing between disliked items, more attention to an item leads to a lower likelihood of choice (Armell et al., 2008). In a similar way, items whose attitudes are harder to access may not benefit enough from the extra attention that they receive to offset the weakened input.
