requires much precise
technical drawings.
However, it is not like
other drawing
programs where you
can simply open and
begin drawing. It
requires a combination
of tools and
mathematical
equations to get
started, and in order to
get the design precise.

An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component. The drawings are linked together by a master drawing or assembly drawing which gives the drawing numbers of the subsequent detailed components, quantities required, construction materia
