History Coastal Engineering

History of Coastal Engineering. Coastal engineering, as it relates to harbours, starts with the development of ancient civilizations together with the origin of maritime traffic, perhaps before 3500 B.C. Docks, breakwaters, and other harbour works were built by hand and often in a grand scale. Some of the harbour works are still visible in a few of the harbours that exist today, while others have recently been explored by underwater archaeologists.

History and Heritage of Coastal Engineering: A Collection

...

Coastal engineering is a branch of civil engineering concerned with the specific demands posed by constructing at or near the coast, as well as the development of the coast itself. The

hydrodynamic impact of especially waves, tides, storm surges and tsunamis and the harsh environment of salt seawater are typical challenges for the coastal engineer – as are the morphodynamic changes of the coastal topography, caused both by the autonomous development of the system and man-made changes. The ...

Coastal engineering - Wikipedia

Coastal engineering, history of. Initial developments in coastal engineering were probably related to the establishment of ports in sheltered waters. Observations concerned what was immediately visible: winds, tides, currents, and perhaps local waves.
