This confocal image shows an adult mouse hippocampus in which serine racemase (magenta) colocalizes with microtubule associated protein 2 (green) in the apical dendrites of CA1 pyramidal neurons in stratum radiatum.

Journal of Neuroscience

From the ancient Egyptian mummifications to 18th-century scientific research on "globules" and neurons, there is evidence of neuroscience practice throughout the early periods of history. The early civilizations lacked adequate means to obtain knowledge about the human brain. Their assumptions about the inner workings of the mind, therefore, were not accurate.

History of neuroscience - Wikipedia

Neuroscience research at Columbia has a rich history dating back to the founding of the Neurological Institute in Manhattan in 1909. The Institute moved to Washington Heights as an affiliate of the Columbia University Medical Center in 1929. The Department was founded in 2007 replacing the more broadly based Center for Neurobiology and Behavior.
